New products

Smart Feed

Automated seed supply.

Data Matrix code scanning integration reduces human error, while the fully integrated feeding system saves time in planting, and the combination of plant chamber magazines and seed containers within one module ensures maximum efficiency.

Alpha NH

Meet the Alpha NH, our combine developed specifically for seed multiplication.

Smart features reduce the combine cleaning time to a minimum and increase the number of seed multiplication fields per day.

Smart Lab

Automatic seed processing line.

The integrated control enables reproducible and traceable process data, increases operator safety through a central aspiration concept, and allows more samples to be produced per day by eliminating transport and layover times.
