WINTERSTEIGER TUNING TOOLS

The WINTERSTEIGER Retail Program

1

The WINTERSTEIGER Retail Program

The WINTERSTEIGER retail program features tools and information for the consumer to maintain their equipment between shop visits.

The more the consumer is educated about properly tuned equipment, the more shop visits they will make during the season. WINTERSTEIGER Ski and Snowboard Tuning Tools are the perfect solution for the do-it-yourselfer who wants to keep their skis and snowboards in top notch condition between visits to your WINTERSTEIGER repair shop. Not only are we offering the highest quality tools, we also offer displays and packaging that tie the product line back to your repair shop. Our complete line of hand tools allow your customers to wax, repair minor base damage and keep their edges sharp and smooth. Detailed product use and consumer information about the need for tuning is available online at our consumer based web site www.tuneyourskisandboards.com. All retail products have EAN-codes on the packaging.

Ski Vise SPORT PLUS

Sturdy, high-tensile aluminium vise for tuning all types and shapes of skis. The Vise SPORT PLUS is a very easy to use for tuning all types and shapes of skis. Features sturdy high tensile aluminum and is light and easy to transport. The holding system keeps the ski secure for base and side edge work. Includes 2 brake retainers (packaged for retail). NEW: this vise allows also a 60° positioning of the skis for fast and simple edge tuning.

57-401-014
57-401-012

Spare Binding Retainer

pcs.
pcs.

Ski Vise PRO

For use when maximum holding power is needed. The Ski Vise Pro Wide Opening has jaws with 90 mm of holding surface and is built to withstand heavy use. The holding frame includes shelfless jaws that will hold any shape sidewall and can accommodate riser plates. The adjustable guide blocks include the locking spindle. This feature allows the ski to be held sideways for edge and sidewall work without interference from the holding vise. This vise allows a positioning of 60° when tuning the side edge for faster and simpler tuning. Opening up to 155 mm.

57-401-225

pcs.

Ski Vise RACING

Heavy duty, high-tensile aluminium vise for tuning skis. The Ski Vise RACING has jaws with 70 mm of holding surface and is built to withstand heavy use. The holding frame includes shelfless jaws that will hold any shape sidewall and can accommodate riser plates. The adjustable guide blocks include the locking spindle. This vise allows a positioning of 60° when tuning the side edge for faster and simpler tuning. Opening from 40 to 100 mm.

57-401-020

pcs.

Board/Freeride Stopper

Sturdy universal vise for tuning snowboards and wide skis. This vise comes with a high-impact plastic body and a special rubber grip top that holds the snowboard extremely well for flat filing and waxing. For two side edge positions: standard 90° and easy 60°. Suitable for all kinds and shapes of skis and snowboards. Binding clearance: 160 mm.

57-401-025

pcs.

WINTERSTEIGER TUNING TOOLS

The WINTERSTEIGER Retail Program

1

Brake Retainer green

To fix the ski brakes in upper position. A universal ski brake retainer with more flex that works with all bindings. This specially formulated rubber compound is tough, long lasting with 100 % elongation. (packaged for retail).

57-440-003	4 pcs.	pk.
------------	--------	-----

Flatness Tester 150 mm

L = 15 cm x Ø 1,27 cm diameter tru bar. Heat treated and black oxide treated. Place the tru bar on the base in the tip, under the binding, and on the tail to check for flatness, by looking for light under the tru bar in the middle or by the edges (packaged for retail).

57-203-201	150 mm	pcs.
------------	--------	------

Sidewall Planer Ergo Razor

To remove sidewall material. The ERGO RAZOR sidewall planer is essential to prep for side edge filing as it is common for a file to be compromised by cutting into the sidewall of a ski. It is very important to remove the sidewall material to avoid loading files with plastic and to keep the sidewall from interfering with the bevel on the edge. The razor has an ergonomic design that fits into the palm of the hand. It is adjustable and can be used with both the right and left hands. It comes with a round cutting blade (packaged for retail).

57-401-100	Sidewall Planer	pcs.
------------	-----------------	------

Aluminium Side Edge File Guides

Our precision anodized aluminum file guides are the perfect choice for the home tuner. Each guide is milled with a channel in the corner to allow filings to fall away from the base. Tools can be used with most files and diamond or abrasive stone (packaged for retail).

57-401-300	90°	pcs.
57-401-301	89°	pcs.
57-401-302	88°	pcs.
57-401-303	87°	pcs.
57-401-304	86°	pcs.

BASE EDGE File Guide

To bevel the base edge from 0,5 to 1,5 degree. This base edge file guide uses the same quality in design and materials as the standard BASE EDGE File Guides (packaged for retail).

57-401-112	0,5° – 1,5°	pcs.
------------	-------------	------

File Guide PRO SHARP RACE, 85° - 90°

This updated professional side edge sharpener gives very accurate bevels from 90 to 85 degrees. A large knob allows adjustment to one of the 6 possible positions without the need of a screwdriver. Innovative arrow pattern allows waste material to fall free of the base without damage and reduces friction. Accepts file, stones, and diamond stones up to 6 mm thick and comes with a 80 mm ICECUT file (packaged for retail).

57-401-030	85° – 90°	pcs.
------------	-----------	------

WINTERSTEIGER TUNING TOOLS

The WINTERSTEIGER Retail Program

1

RACING SHARP File Guide

Ergonomic design side and base edge sharpener is easy to use and allows your customers to maintain their edges between visits to your repair facility. Allows for 89° to 86° side edge bevel and 0.5° and 1° base edge bevel. (packaged for retail)

57-401-145	+ Finn File 80 mm	pcs.
57-401-174	Spare File 80 mm	pcs.

QUICK SHARP File Guide

Side edge sharpener for 89 - 88 degrees. Great for the customer who is new to maintaining their own equipment, WINTERSTEIGER offers this entry level tool. The plastic molded tools are easy to use and carry on the hill. The Quick Sharp tools are available with zirconium, file and diamond abrasive tools (packaged for retail).

57-401-163	+ Zircon, Finn, Diamond File	pcs.
57-401-161	+ Finn File 40 mm	pcs.
55-500-106	Spare Finn File 40mm	pcs.
55-500-108	Spare Diamond File	pcs.
57-401-173	Spare Zirconium File	pcs.

Mill Bastard File

These are not the low quality files traditionally associated with retail sales. Guaranteed for their quality and straightness, these are the best files you will find for the money (packaged for retail).

55-500-135	Hard Chrome File 150 mm	pcs.
55-500-155	Non Chrome File 150 mm	pcs.

ICECUT Professional File

Used by World Cup technicians because of the precision cut teeth and comfortable tangless design. ICECUT files are also the straightest file available for accurate beveling and have one of the highest Rockwell hardness for extended life. (packaged for retail)

55-500-046	150 mm	pcs.
55-500-047	200 mm	pcs.

Diamond File SPORT

The latest in diamond stone technology, this is the best diamond stone we have ever used. The rigid composite body resists flex during use. The unique diamond design with ultra high quality diamonds means a long life. Best used with water. Comes in two lengths 70 and 100 mm. (packaged for retail)

57-401-210	Grit 600, fine, 70 mm	pcs.
57-401-211	Grit 400, medium, 70 mm	pcs.
57-401-212	Grit 200, coarse, 70 mm	pcs.
57-401-220	Grit 600, fine, 100 mm	pcs.
57-401-221	Grit 400, medium, 100 mm	pcs.
57-401-222	Grit 200, coarse, 100 mm	pcs.

WINTERSTEIGER TUNING TOOLS

The WINTERSTEIGER Retail Program

1

File Brush/Card

To clean debris from the teeth of files. Proper cleaning helps to prolong the life of a file and ensures better overall tuning results (packaged for retail).

57-200-050

pcs.

Pocket Stone

For quickly removing minor burrs and imperfections on edges. Use the pocket stone mounted in the file guide to remove any striations left by the file to further polish the edge (packaged for retail).

57-200-102

100 x 18 x 8 mm

pcs.

Vanilla Ski Base Cleaner / Wax Remover

Our base cleaner is positively the best available; featuring a quick evaporation rate, in a non toxic formula, and a lighter "aroma" than other base cleaners. Available in 1 gallon industrial size and 16 ounce retail sizes.

57-202-602

16 oz.

pcs.

Edge Tuner Jomax Blade Mini 600

This patented edge sharpener enables the side and base edge of skis and snowboards to be processed at the same time thanks to the flexible attachment of the 3 diamond blades. If a burr arises at the side edge after several days on the slope, the Jomax Blade Mini can be used to remove this burr fast and easy. It improves the edge grip, independent from the existing edge angle. This tool is therefore also suitable for processing skis with V-Edge. **However, this tool is not intended to replace regular edge servicing, especially not V-Edge grinding at the Jupiter service station.**

57-401-340

Suitable for all edge angles

pcs.

Spare file set for Jomax Blade Mini 600 edge tuner

Set with 3 pcs. replacement files Ø 30mm, grit 600 for Jomax Mini art. no. 57-401-340.

57-401-342

pk.

Base fleece for finishing (20 pcs.)

This fleece can be used in a number of ways to gently tune the base:

- to clean the base of the ski with wax remover (item no. 57-202-603)
- to apply liquid wax (item no. 55-640-300)
- to completely rid the base of all waxing and sanding dust after the ski service

57-202-604

20 pcs. Base Fleece (17x17 cm)

pk.

WINTERSTEIGER TUNING TOOLS

The WINTERSTEIGER Retail Program

1

Drip Candles

Drip candles provide base repair material for repairing scratches and damage to the base on skis and snowboards (packaged for retail).

57-440-001	Black, 3 pcs.	pk.
57-440-002	Clear, 3 pcs.	pk.

WINTERSTEIGER Personal Repair Pistol

For long lasting repairs to larger scratches and damaged areas. The Personal Repair Pistol allows for longer lasting, more abrasionresistant repairs than those done with just drip candles. This consumerbased repair gun is perfect for casual use and gives great results.(packaged for retail, 90 day warranty)

57-440-051	Repair Pistol 110 V	pcs.
57-440-055	Repair sticks black, 3 pcs.	pk.
57-440-056	Repair sticks clear, 3 pcs.	pk.

Metal Scraper

To remove excess repair material from the base. After the repair material has cooled completely, use the metal scraper to remove the excess material and blend the repair into the base. (packaged for retail)

55-240-457	130 x 60 x 0,7 mm	pcs.
------------	-------------------	------

WINTERSTEIGER Wax Iron

High quality wax iron for skis and snowboards. Fine tuned thermostat reduces temperature fluctuations and a thick metal base holds heat to prevent damage during waxing (packaged for retail, 30 day warranty).

57-100-299	110 V / 60 Hz, 800 W	pcs.
------------	----------------------	------

WINTERSTEIGER Digital Wax Iron

Precise temperature settings with digital control combine with a highly accurate thermostat to ensure a correct, constant temperature. Adjustable from 50° to 180° C. 15 mm thick heating plate with innovative dimpled surface which allows the wax iron to easily move across the base by reducing suction. The beveled edges let melted wax flow over the entire base evenly for consistent results (packaged for retail, 90 days warranty).

57-100-315	110 V, 60 Hz, 800 W	pcs.
------------	---------------------	------

WINTERSTEIGER Easy Wax Liquid 60 ml

Liquid Wax for easy and fast application. You and your customers will love this easy to use liquid wax from WINTERSTEIGER. Application is as easy as rub-on, buff off, GO! 60 ml bottle with built-in sponge applicator. minimum order quantity 8 pcs.

57-440-112	with sponge applicator, 60 ml	pcs.
------------	-------------------------------	------

WINTERSTEIGER TUNING TOOLS

The WINTERSTEIGER Retail Program

1

WINTERSTEIGER All Condition RUB-ON or IRON-ON WAX

WINTERSTEIGER WAX is made in the USA using environmentally friendly techniques by global market leader, Wax Research. Each eco-friendly bar is hand-crafted to offer the performance of chemically infused waxes, without any hazardous chemicals. Our non-fluoro ski and snowboard waxes utilize sustainable non-GMO, plant-based oils. Designed for high performance with a responsibility to the mountains we love. Boxed for retail in 100g bars.

57-440-140	All Conditions 5-39°F/-15to4°C	pcs.
57-440-141	Above 4 +39°F / +4° C above	pcs.
57-440-142	- 15 Below Cold <-5°F/-15°C	pcs.

Plexi Scraper Alpine

To remove cooled wax from the base. After the wax has cooled to room temperature, any excess must be scraped off and the structure must be brushed. Always allow the wax and the ski or snowboard to cool to room temperature before scraping, otherwise the warm wax will be pulled from the pores, leaving the base dry.

55-200-013	130 x 60 x 3 mm	pcs.
------------	-----------------	------

Plexi Scraper Snowboard

55-200-015	320 x 70 x 5 mm	pcs.
------------	-----------------	------

Race Service Plastic Scraper Sharpener

Designed to meet the needs of race service personal and service techs alike. The tall sides hold the plastic scraper in the perfect upright position while the large base provide a stable platform to hold the tool. The plastic is removed by a replaceable 100 mm panzer file and requires no adjustment to the blade.

57-203-430	Scraper Sharpener	pcs.
57-203-432	Replacement Blade 100 mm	pcs.

Scraper Sharpener WINTERSTEIGER, 100-240 V / 50-60 Hz US

Manual resharpening of plexi scrapers can be a nerve-racking challenge after hot waxing with the wax iron. This electronic scraper sharpener sharpens scrapers quickly and conveniently, making your work more comfortable and efficient. An absolute must-have, especially for frequent waxers.

55-200-021	100 - 240 V / 50 - 60 Hz	pcs.
------------	--------------------------	------

Wax Buffing Pad (Scotchbrite)

Pad to remove excess wax and buffing in of Rub On Waxes. Scotch Brite nylon wax buffing pads are a great tool for removing excess wax from the base and sidewalls of skis and snowboards. Used with light pressure after the wax has been scraped off the base, helps to expose the structure.

57-440-010	220 x 150 mm	pcs.
------------	--------------	------

WINTERSTEIGER TUNING TOOLS

The WINTERSTEIGER Retail Program

1

Wax Brush Bronze

This stiff, all-bronze base brush is perfect for cleaning out wax in a coarse structure on the base before applying hot wax. Comes with a hang tag and sticker, packaged for retail.

55-500-077 with euro hole hanger pcs.

Wax Brush Nylon

General purpose stiff nylon bristle brush. Perfect for wax texturing. Comes with a hang tag and sticker, packaged for retail.

55-500-016 with euro hole hanger pcs.

Wax Brush Horsehair

This is a high quality brush used for cross-country, alpine and snowboard tuning. An essential tool for the serious tuner to expose the base texture. Comes with a hang tag and sticker, packaged for retail.

55-500-078 with euro hole hanger pcs.

Soft Red Gummi Stone

For fine buffing and polishing on the edge. Starting at the tip of the ski/board, the gummi stone should be run at a 45 degree angle for up to 10 to 20 cm past the contact point. Making multiple passes, reducing the length of the stroke each time, feather the edge from the tip to the set bevels. Run the gummi stone from tip to tail to deburr and repeat the detune process in the tail (packaged for retail).

57-420-242 very fine, 40 x 20 x 65 mm pcs.

------------	--	------

The Double Wide

Snowboard or double wide ski EGGBAR Vise, with machined aluminum tracks, Laser cut steel, powder coated. The double wide ski / snowboard vise works on the same principle as the ski vise just dimensionally wider. A snowboard or skis can be put in horizontally or vertically without adjusting or tightening anything. Shops and individuals that work on snowboards and skis love the double wide ski/ snowboard vise because a pair of skis or a snowboard can be worked on in the same vise.

57-402-110	Vise	pcs.
57-402-112	Replacement Rubber	pcs.

World Cup Vise

The New "World Cup" clamp Style Eggbar Vise has the same great patented design as the Original / Race Vise in a clamp style version. Simple yet works great for holding the ski while tuning in the vertical or horizontal position . There is more surface area and more stability built into the design, verses other vises on the market. The vise can be mounted/clamped on a table, counter top, bench or anywhere a "C" clamp could be attached. CNC Laser cut 6061, powder coated aircraft aluminum. Replaceable BUNA rubber. Made in USA.

57-401-114	Ø 6" ,11.5" High, 4 lbs.	pcs.
------------	--------------------------	------

Ski Mounting System

Two whale-tails and tracks makes it easy to balance the dance between getting the flex out of the ski while making room for the tabs on the binding jig. You will love it!

57-402-111		pcs.
------------	--	------

Ski Vise PRO

For use when maximum holding power is needed. The Ski Vise Pro Wide Opening has jaws with 90 mm of holding surface and is built to withstand heavy use. The holding frame includes shelfless jaws that will hold any shape sidewall and can accommodate riser plates. The adjustable guide blocks include the locking spindle. This feature allows the ski to be held sideways for edge and sidewall work without interference from the holding vise. This vise allows a positioning of 60° when tuning the side edge for faster and simpler tuning. Opening up to 155 mm.

57-401-225		pcs.

pcs.

WORKSHOP ACCESSORIES

Work Benches and Accessories

Cross Country and Snowboard Support

The Universal Support attaches to the adjustable guide block of the ski vise RACING. It gives more support to cross country skis and snowboards during tuning.

55-500-054

pair

Ski Vise Cross-Country

The toe piece is attached to a cross bar on the center section and is held securely. High tensile aluminum body ensures years of use yet it is light and compact for easy travel. The best cross country vise we have seen by far. Updated design.

57-401-331

pcs.

Ski Vise QUICK

Light weight high-tensile aluminum vise for tuning alpine skis. The angled design accepts race and carving skis with plates without touching the bench when working on side or base edges. The support tops are covered with special rubber grips containing small suction cups to grip the ski during base work.

57-401-006

pcs.

Double Ski Vise SUPER PRO PLUS

Double Ski Vise SUPER PRO PLUS is the next evolution in ski and board tuning and mounting vises. The vise now bolts to the work surface making it more secure for working on the base or mounting bindings. The supports include a vise to hold both skis and boards tightly while working on side edges. Great shop vise for alpine and cross country skis as well as snowboards. Max jaw opening for skis 70 mm, snowboards 270 mm.

WINTERSTEIGER Quickfix universal

Fast, universal, flexible

The WINTERSTEIGER Quickfix backshop vise allows for quick and secure clamping of all types of alpine, touring, cross-country skis and snowboards in one universal clamping system. This backshop vise also features a vertical clamp on the optional adjustable rests. That allows skis to be clamped vertically so that side edges can be tuned quickly and easily.

wintersteiger.com/quickfix

Your Benefits:

- The clamping jaws allow for extremely quick adjustments to accommodate skis and snowboards.
- The clamping force can be adjusted precisely using the new handwheel so that only the appropriated amount of force is used.
- A pair of skis, up to 120 mm in width in the binding area, can be securely clamped in place. By using the included SNB clamping jaws, a pair of skis up to 140 mm width at the binding area can also be secured.
- Single or pairs of cross-country skis can be clamped for service using the optional XC ski rests.
- The optional clamping jaws for snowboards allows boards up to 320 mm width at the binding area to be secured.
- Vertical clamping of single skis for side edge tuning is done at a 30° angle for a more ergonomic side edge tuning.

7050-401-00-V1	Complete Quickfix Vise	pcs.

Quickfix Extreme Carver Extension 65mm

This product can be used to increase the distance of two extreme carver skis by 65 mm, therewith skis with an extreme waist can also be clamped pairwise at the Quickfix clamping system.

7050-1211-M04		pair
---------------	--	------

Quickfix XC- Rests, 1 pair

Cross-country skis are built to be extremely weight-saving. We therefore recommend using the optional Nordic ski rests for cross- country ski services, to provide even better support for the ski. 2 pairs of Nordic rests are required to clamp one pair of cross-country skis.

7050-1211-M01	Quickfix XC- rests	pair
---------------	--------------------	------

Quickfix Spare clamping Jaws Ski, 1 pair

These replacement clamping jaws are supplied as standard with the Quickfix clamping system (7050-401-10), and constitute the perfect spare part.

7050-1211-M02	Quickfix Spare clamp jaws ski	pair
---------------	-------------------------------	------

Quickfix SNB-Jaws, steplike, 1 pair

Snowboards can of course also be clamped with the standard clamping jaws included with the Quickfix clamping system (7050-401-10). To make it easier to work with snowboards, however, we still recommend these optional snowboard clamping jaws.

Safety Material

Safety Stripe Tape Black/Yellow, 2 in x 36 yd, 5.4 mil.

Mark and identify safety hazards with our black and yellow 3M™ Safety Stripe Tape. Designed with unique stretch properties, this tape conforms to irregular, curved and convex surfaces while remaining stretched and without lifting after application. The rubber adhesive has quick stick and excellent holding strength on many surfaces. This combination of the backing and adhesive properties help to prevent edge lifting, keeping the tape in place. The tape removes cleanly in one piece from most surfaces to help reduce clean-up and labor costs. Apply to a clean, dry surface at temperatures between 60°F (16°C) to 80°F (27°C).

57-420-135 2 in x 36 yd pcs.

Respirator

Another quality 3M product designed to help protect against the fumes created while doing base repair and waxing. Soft Mask forms for a comfort fit. NIOSH-approved, filters sold separately.

Binding, Mounting and Repair

Metric / Standard Tape Measure

Measurements shown in inches and millimeters. Rust resistant lacquered blade.

57-100-118	3 meter (10 foot)	pcs.
------------	-------------------	------

Binding Glue, 16 oz

Non water soluble binding glue is designed to lubricate the binding screw and create a tight bond. Binding glue acts as a sealant between wood or foam and metal to prevent water from entering the core of the ski or snowboard. Will not dissolve foam cores on skis or snowboards.

57-202-501	16 oz.	pcs.
------------	--------	------

Epoxy EPOWELD

Two part clear epoxy set time is 12 hours. Excellent all around epoxy for general shop use. Dries clear and will except pigments. Part A-Resin / Part B-Hardner

57-202-527	2 quarts, 1 quart each	pk.
------------	------------------------	-----

HYSOL Epoxy Patch

HYSOL is a flexible Epoxy. Formulation EB (black) and EC (clear). Ideal for bonding, sealing or repairing delaminated skis. At 77°F full cure for black epoxy is obtained in 3 days. 90 % of full cure properties can be achieved in 24 hours. Clear epoxy will harden in 5 to 10 minutes. In 10 to 20 minutes, at least 50 % of bond strength has developed. These times can be accelerated by the use of a heat lamp.

57-202-510	Clear, Quick Set Kit, 2.8 oz.	pk.
57-202-511	Black, General Purpose, 4 oz.	pk.

Epoxy DEVCON

Perfect for on the spot repairs in the back-shop. Comes in handy one ounce dual syringe dispenser.

57-202-515	5 minutes set, 1 oz.	pcs.
57-202-516	30 minutes set, 1 oz.	pcs.

HARDMAN Epoxy Fast Setting

Fast setting Hardman epoxy is a two part epoxy adhesive that sets in just 3 - 5 minutes at room temperature. Bonds to metal, wood and plastic. Hardman Epoxy comes in an easy to use 4 gram disposable package.

57-202-520	Clear, 20 pc.	pk.
------------	---------------	-----

HARDMAN Epoxy very high Peel and Shear Strength Epoxy

A flexible, tough and durable vibration resistant adhesive. Great for sidewall repair, bonds easily to metal. 3.5 grams per package. Work Time 4h, Final Cure 18h - Color: Grey, Viscosity: Honey

57-202-521	10 pc.	pk.
------------	--------	-----

HARDMAN Epoxy Machinable

A tooling and body patch that adheres to metal, wood and hard plastics. Can be machined, sanded, drilled and tapped. Use for patching and filling voids in plastic or for repairing stripped-out binding holes. 3.5 grams per package. Work time 25 min, final cure 4h - color: aluminum, viscosity: honey

57-202-522	10 pcs.	pk.
------------	---------	-----

HARDMAN Non-Sag

Non-Sag, fast setting epoxy bonds to metals, glass, wood, ceramics, rubber, and many plastics. This epoxy is easily applied and will not run or drip on vertical, overhead or curved surfaces and will not wick into porous materials. Use for tacking, sealing and gap-filling. Work time 5 min, final cure 24h - 4 grams per package. Color: Opaque white

57-202-523	10 pcs.	pk.
------------	---------	-----

HARDMAN Urethane

Sold in job size 3.5 gram double-bubble packages of 10, complete with 10 stir sticks. D50 (Green Package): The perfect material for P. U. boot modifications. High peel and lap strength ensures superior bonding. Work time 4 - 8 minutes, handling strength 60 minutes. D50 Green Package.

57-202-524	10 pc.	pk.

Biodegradable Citrus Base Cleaner / Wax Remover

Biodegradable base cleaner that doesn't use petroleum based additives that make it dangerous to the environment. Our new base cleaner is not only more environmentally friendly than other base cleaners it also evaporates without a messy residue. Removes many other sticky messes such as price tag and stomp pad residue.

57-202-640	1 Gallon	pcs.
------------	----------	------

Citrus Base Cleaner / Wax Remover

The best citrus cleaner available on the market today! The organic extract used in this formulation make this base cleaner very easy to use. Use as a replacement for dangerous chlorinated hydrocarbon solvents. This product is non-corrosive and contains petroleum and fruit distillates. Use full strength for removing grease, adhesives and cleaning ski shop machinery. Excellent for use in bike and skate shops as a degreaser. Use citrus base cleaner year round for all your cleaning needs.

57-202-601	1 Gallon	pcs.
------------	----------	------

Base fleece for finishing (20 pcs.)

This fleece can be used in a number of ways to gently tune the base:

- to clean the base of the ski with wax remover (item no. 57-202-603)
- to apply liquid wax (item no. 55-640-300)
- to completely rid the base of all waxing and sanding dust after the ski service

57-202-604 20 pcs. Base Fleece (17x17 cm) pk.

Vanilla Ski Base Cleaner / Wax Remover

The best citrus cleaner available on the market today! The organic extract used in this formulation make this base cleaner very easy to use. Use as a replacement for dangerous chlorinated hydrocarbon solvents. This product is non-corrosive and contains petroleum and fruit distillates. Use full strength for removing grease, adhesives and cleaning ski shop machinery. Excellent for use in bike and skate shops as a de greaser. Use citrus base cleaner year round for all your cleaning needs. Available in 1 gallon industrial size and 16 ounce retail sizes.

57-202-605 1 Gallon pcs.
57-202-602 16 oz. pcs.

Safety Plunger Can

Stores and supplies wax remover or liquid wax. Made to meet OSHA requirements. FM approved.

57-100-128 1 Quart pcs.

Utility Rags

Made from 100 % cotton. This product is great for all types of clean-up. Always have a clean rag available when you need one! Very absorbent and reusable.

57-420-160 75 pcs. heavy duty rags pk.

Pick Set

Best tool for removing small rocks and debris at the base.

57-500-201 4 pcs. pk.

Base Repair Set with Thermo Plate

Kit includes epoxy, silicone release paper, 1m lengths of white, clear, and black base material, rectangular, oval, semi-circular punches, heating plate and clamp. User must install 110 V plug.

WORKSHOP ACCESSORIES

Baseman Base Repair Machine

Co-Polymer Wire

Co-polymer wire base repair material contains special formulated epoxy for extra bonding strength. Sold in 3 mm size. For hot air applications only.

57-202-901	Clear, Ø=3 mm, 300 ft	roll
57-202-902	Black, Ø=3 mm, 300 ft	roll

Metal Grip

Polyethylene wire with adhesive for very deep scratches at the base. Once metal grip has been applied, standard base repair material is laid over it for a finished repair. Attention: don't use with repair pistols!

55-560-330	Clear Ø =5 mm, 0,4 kg roll	pcs.
55-560-331	Black, Ø = 5 mm, 0,4 kg roll	pcs.

Baseman Base Repair Machine

Baseman Base repair machine for skis and snowboards.

The Baseman was developed with an ergonomic lightweight design for ease of work! It also brings many more benefits. The repair location is easier to see thanks to integrated LED lighting. The high-performance heating unit with electronic temperature control means that the machine is quickly ready for action. Improved melting technology guarantees a high-quality and wear-resistant bond between the base and the repair material. The optimized melting head and material feed ensure uniform and thin material application. Perfect distribution of material shortens the melting time and reduces the time spent for subsequent work steps such as base grinding.

Your benefits summed up:

- High level of user convenience thanks to ergonomic lightweight design
- Efficient downstream processing thanks to optimum melting results
- Excellent cost-effectiveness thanks to frugal use of material and stand-by operation
- Rapid heat-up time thanks to powerful heating unit
- Best possible view of the repair location with integrated LED lighting
- Easy replacement of the base repair material roll
- Improved ambient air thanks to (optional) Smogjet exhaust air system

Melting head with larger contact surface, lower center of gravity and lighting for a better view of the melting area. Results: Tangibly improved control.

Consistent temperature control with status indicator

Practical stand with cleaning blade

Optional “Smogjet” air extraction system for an improved work experience.

Technical data

Baseman

Nominal voltage	1AC 100 – 240 V, 50/60Hz
Nominal load	0,63 kW
Nominal current	5,8/2,8 A
Fuse protection min./max.	10/13 A
Weight	1,8 kg (4 lbs)
Dimensions (L x W x H)	540 x 80 x 305 mm (without docking station)
Polyethylene material	Ø 3 mm, 250 g
Connection for extraction unit	Ø 30 mm
Noise emission max.	< 52 dB (A)

Smogjet

Nominal voltage	1AC 100 – 240 V, 50/60Hz
Nominal load	0,1 kW
Nominal current	0,9/0,43 A
Fuse protection min./max.	6,3 A
Weight	12 kg
Dimensions (L x W x H)	456 x 496 x 200 mm
Extraction capacity	100 m³/h
Noise emission max.	> 52 dB (A)

We reserve the right to make technical alterations.

WORKSHOP ACCESSORIES

Smogjet Air Filter System

Baseman 1 x 110 - 240 V, 50/60 Hz

Also order Polyethylene Wire 55-560-160 Clear or 55-560-161 Black to use when your Baseman arrives. We reserve the right to make technical alterations.

Edge Care

Sidewall Planer Ergo Razor

To remove sidewall material. The ERGO RAZOR sidewall planer is essential to prep for side edge filing as it is common for a file to be compromised by cutting into the sidewall of a ski. It is very important to remove the sidewall material to avoid loading files with plastic and to keep the sidewall from interfering with the bevel on the edge. The razor has an ergonomic design that fits into the palm of the hand. It is adjustable and can be used with both the right and left hands. It comes with a round cutting blade (packaged for retail).

57-401-100	Sidewall Planer	pcs.
------------	-----------------	------

Replacement Blade, square

Suitable to the ERGO RAZOR sidewall planer.

0,5° – 1,5°

pcs.

File Guide PRO SHARP RACE, 85° - 90°

This updated professional side edge sharpener gives very accurate bevels from 90 to 85 degrees. A large knob allows adjustment to one of the 6 possible positions without the need of a screwdriver. Innovative arrow pattern allows waste material to fall free of the base without damage and reduces friction. Accepts file, stones, and diamond stones up to 6 mm thick and comes with a 80 mm ICECUT file (packaged for retail).

57-401-030

85° – 90°

pcs.

Side Edge File Guides

Our precision anodized aluminum file guides are the perfect choice for the home tuner. Each guide is milled with a channel in the corner to allow filings to fall away from the base. Tools can be used with most files and diamond or abrasive stones. (packaged for retail)

Edge Tuner Jomax Blade Mini 600

This patented edge sharpener enables the side and base edge of skis and snowboards to be processed at the same time thanks to the flexible attachment of the 3 diamond blades. If a burr arises at the side edge after several days on the slope, the Jomax Blade Mini can be used to remove this burr fast and easy. It improves the edge grip, independent from the existing edge angle. This tool is therefore also suitable for processing skis with V-Edge. **However, this tool is not intended to replace regular edge servicing, especially not V-Edge grinding at the Jupiter service station.**

57-401-340	Suitable for all edge angles	pcs.
------------	------------------------------	------

Spare file set for Jomax Blade Mini 600 edge tuner

Set with 3 pcs. replacement files Ø 30mm, grit 600 for Jomax Mini art. no. 57-401-340.

57-401-342		pk.

With a 10x magnification, this magnifying glass allows detailed inspection of the edge surface.

57-202-770 Ø 45 x 40mm pcs.

NEW

Structure and edge measuring magnifier 10X LED

Focusable LED measuring magnifier (Ø = 35 mm x H = 55 mm) for the optical analysis of the base structure and the steel edges; with 10x magnification and 8 LEDs in the housing ring, which ensure bright and high-contrast illumination of the measuring area; the LED lighting can be conveniently switched on and off using the pushbutton on the housing; the infinitely variable focusing enables a clear, high-resolution image in the field of view; lenses have anti-reflective coating. Measuring range: 30 mm, scale: 0.1 mm.

56-260-100 Ø 35 x 55mm pcs.

The perfect process for a perfect wax

Optimal wax application with Waxpro 160 Digital

The handy Waxpro 160 Digital tabletop waxing device with its 160-mm-wide silicone application wheel fulfills all the requirements needed for a quick and uniform wax application on all ski and snowboard bases. It is digitally controlled to guarantee a precise temperature setting and its housing is thermally insulated.

Product characteristics

- Small and handy tabletop waxing device with a 160-mm-wide silicone wheel for uniform wax application.
- Precise temperature setting between 90 °C and 140 °C via digital displays.
- Guarantees an increased saturation of the base with wax as well as longer adhesion due to the subsequent treatment with Wax Future.
- Easy dosing of the wax application depending on the manual feed speed.

Advantages of optional items

- Art. no. 55-115-134 additional waxing wheel, handy for workshop operations using different wax types.
- Art. no. 55-115-132 stainless steel shelf (including an aluminum handle) for 3 wax tubs for easy changes even when the wax is hot.
- Flexible use in service workshops. To keep the workbench clear, we will be offering a height-adjustable stand on wheels (art. no. 7579-0111-V01) in future. It will include two integrated storage compartments for additional wax tubs.

Higher wax absorption with Wax Future

The Wax Future infrared waxing device uses heat treatment to increase the saturation of wax in the base, resulting in a wax quality comparable to that enjoyed by racers.

Product characteristics

- Wax quality is easy to program by controlling the feed speed and number of repetitions
- Fast and easy to use
- Wall mounting possible to save space
- Optional leveling feet
- Available with 1 or 2 lamps
- Dimensions: 2,500 x 750 x 320 mm (L x W x H, without leveling feet)
- 3-year guarantee

Speedbrush – The wax brush machine for pros

The Speedbrush impresses with individually adjustable electronic speed control, a powerful motor, and rapid brush replacement. The split double brush delivers fast, even brushing action on the base structure with the white part and the perfect polish with the black part.

Product characteristics

- Variable speed (continuously adjustable)
- Simple brush replacement
- Optional stand (height-adjustable)
- Optionally, the device mounted at the stand can be equipped with a suction nozzle and a FESTOOL CLEANTEC CTL extraction system. Wax residues are therefore extracted quickly and efficiently
- Working height of 880 mm–1,025 mm
- Connected load: 0.75 kW
- Dimensions: 710 x 500 x 985–1,130 mm (L x W x H; incl. stand)

2

Waxjet Pro 110 V / 60 Hz

The Waxjet Pro from WINTERSTEIGER provides excellent waxing results featuring a short heat-up time. The new heating system provides a precise temperature control, while using up to 60 % less energy than comparable products. The optional edge deburring wheel and the easy roll exchange offers a very user-friendly service.

7570-404-43 pcs.

Optional Stand for Waxjet Pro

7570-0111-V01 61 x 59 x 45 cm (L x W x H) pcs.

Optional Deburring Wheel for Waxjet Pro

7570-0211-V10 pcs.

Waxjet 208 - 240V / 50 - 60 Hz

The short heat-up time means the Waxjet is quickly ready for use. WINTERSTEIGER's roller technology promotes more wax absorption through the base and simultaneously guarantees minimum consumption of material. Additional time spent removing the wax is no longer needed. The use of polishing or nylon brushes saves you extensive manual finishing work. A practical universal stand for storing small parts and consumables is available as an option.

7568-421-33 pcs.

Stand with Wheels for Waxjet 93

7925-401 75 x 48 x 51 cm (L x W x H) pcs.

Exhaustion Hood for Waxjet

Including 30° pipe bend and 150 mm hose connection nozzle. The suction hose connecting to this and any extractor fan which may be required must be provided on site.

Waxjet 80/90 SNB, Waxjet 90, Waxjet 91, Waxjet 93

7567-4411-V01 pcs.

Waxpro 40

The handy waxer with changeable wax tub, adjustable waxing temperature; wax application in a few seconds and exact dosing. Including 120 mm wide wax roller.

WEND Waxes

WEND was born from a passion for high-performance skiing, without harm to the world around us. Backed by more than 50 years of wax research, creativity, and innovation, WEND produces ultra-fast ski and snowboard waxes without the nasty additives, for a durable, exceptional glide that's entirely fluoro-free, non-toxic, and biodegradable.

Hand-poured in our zero-waste, California facility, WEND waxes use exclusive eco-friendly materials and formulations for watershed-safe glide and base protection that won't slow you down. Proven through decades of extensive lab and on-snow testing, WEND waxes are chosen and trusted throughout the industry, from competition wax for top professional skiers, snowboarders, and race technicians to the preferred factory wax for leading ski and snowboard manufacturers.

With a sophisticated wax line of liquids, hot melts, overlays, pastes, cleaner/conditioners, and emulsion/dispersion formulations, WEND covers every waxing need from backroom shop service to high-performance all-mountain and competitive racing.

WEND TECHNOLOGY

WEND waxes utilize three primary technologies, with different formulations and concentrations for all-mountain, training, and competition use:

Natural Plant (NP) Waxes: These 100% plant-derived waxes are petroleum-free, sustainably-sourced, non-toxic, and biodegradable.

Meadowfoam® (MF) Waxes: Meadowfoam® is our cornerstone technology, a seed oil and wax cultivated from wildflowers native to CA & OR to deliver exceptional hydrophobic properties. Non-toxic, biodegradable, and safe at high temperatures.

Nano-Tech Waxes: Cutting-edge nanotechnology additives directly replace PTFE (fluoro) components. Fluoro-free, non-toxic and biodegradable, providing world-class glide without environmental harm.

Speed Boost Race Base

Developed for the highest levels of racing, Speed Boost Race Base uses ultra-high molecular density spherical additives with a large particle size and narrow distribution.

WEND PERFORMANCE WAXES

WEND Performance Wax is formulated to provide great glide, resistance to snow contaminants, excellent base penetration and increased base protection for all-mountain skiing and snowboarding. WEND's Performance Waxes are available in precisely-crafted NP Performance (100% natural plant based) and MF Performance (paraffin with Meadowfoam® seed oils) wax blends for all temperature ranges and snow conditions. Biodegradable, non-toxic, and fluoro-free, every batch of WEND Performance Wax is hand-poured in our zero-waste California facility.

NP Performance Waxes

100% plant-derived ingredients, sustainable, biodegradable, and non-toxic

WEND NP Performance waxes are made with 100% plant-derived ingredients, for high-performance glide and base protection in a completely petroleum-free wax. All-natural, biodegradable, and non-toxic waxes, with a broad Universal temperature range for fast glide over a wide range of conditions.

WORKSHOP ACCESSORIES

WEND Waxes

2

WEND NP Performance Wax – Infrared Rub-On/Paste

High-performance, 100% plant-based wax for all-mountain conditions. IR waxes are specially formulated for easy application and deep base penetration with a Wintersteiger IR Wax Future (or similar infrared machine).

57-212-530	Universal 100g	pcs.
57-212-532	Universal 1 Kg	pcs.
57-212-534	Paste Wax 280g	pcs.

WEND NP Non-Petroleum Hot Melt/Rub-On 100g

High-performance, all-natural plant wax for all-mountain conditions. Petroleum-free, 100% plant-derived, biodegradable, and non-toxic.

57-212-525	Universal Run-On 100g	pcs.
------------	-----------------------	------

WEND NP Performance Liquid Wax – 4.5g Towelette

High-performance, all-natural plant wax in a liquid towelette for quick application without an iron. Durable, fast glide in any snow conditions that's petroleum-free, 100% plant-based, biodegradable, and non-toxic. Available in a 50-pack of 4.5g towelettes

57-212-527	Universal Towelette 50-pack	pcs.
------------	-----------------------------	------

WEND NP Non-Petroleum Paste Tin (12 pk)

High-performance, all-natural plant wax for all-mountain conditions. Petroleum-free, 100% plant-derived, biodegradable, and non-toxic. Let the paste dry for a couple of minutes, then use a clean towel to buff the paste to a shine.

57-212-524	Universal Paste (2oz/56g) 12 P	pcs.
------------	--------------------------------	------

MF Performance Waxes

WITH MEADOWFOAM®

High-performance, all-mountain wax with Meadowfoam®

WEND MF Performance waxes use Meadowfoam® seed oils and waxes for deep base penetration, prolonged durability, and exceptional hydrophobic glide from a non-fluoro wax. MF Performance Waxes are formulated for a wide range of temperatures and conditions, and are non-toxic, biodegradable, and safe at high temperatures.

2

WEND MF Performance Wax – Infrared Rub-On/Paste

High-performance, Meadowfoam® wax for all-mountain conditions. IR waxes are specially formulated for easy application and deep base penetration with a Wintersteiger IR Wax Future (or similar infrared machine).

57-212-531	Universal 100g	pcs.
57-212-533	Universal 1 Kg	pcs.
57-212-535	Paste Wax 280g	pcs.

WEND MF Performance Wax – 30g Bit Bar

Meadowfoam® wax bit bars, formulated for rub-on or iron-on application with a wide Universal temperature range. 30g bars, available in Countertop Fishbowl or refill case.

57-212-429	Fish Bowl +48 Bit Bars	pcs.
57-212-428	Case of 24 Bit Bars	pcs.

WORKSHOP ACCESSORIES

WEND Waxes

WEND MF Performance Wax – Combo 3 Pack

High-performance, Meadowfoam® wax for all-mountain conditions, available in a combo pack of three 30g bars for different temperature ranges.

57-212-421	Cold/Warm/Universal Combo Pk.	pcs.
57-212-420	Mid/Warm/Universal Combo Pk.	pcs.

WEND MF Performance Wax – 100g Hot Melt/Rub-On

High-performance, Meadowfoam® wax for all-mountain conditions. Base Prep saturates your equipment for the specific conditions wax of your choice. 100g bars.

57-212-390	Prep Saturation	pcs.
57-212-422	Universal	pcs.
57-212-423	Warm	pcs.
57-212-424	Mid	pcs.
57-212-425	Cold	pcs.
57-212-391	XCold	pcs.
57-212-426	Graphite Universal	pcs.

WEND MF Performance Wax – 300g Hot Melt

High-performance, Meadowfoam® wax for all-mountain conditions. 300g blocks.

57-212-500	Prep Saturation	pcs.
57-212-501	Universal	pcs.
57-212-502	Warm	pcs.

57-212-505	XCold	pcs.
57-212-506	Graphite Universal	pcs.

WEND MF Performance Wax – 1kg Hot Melt

High-performance, Meadowfoam® wax for all-mountain conditions. 1kg bulk (4 blocks).

57-212-410	Prep Saturation	pcs.
57-212-411	Universal	pcs.
57-212-412	Warm	pcs.
57-212-413	Mid	pcs.
57-212-414	Cold	pcs.
57-212-415	XCold	pcs.
57-212-427	Graphite Universal	pcs.

WEND RACE WAXES

WITH MEADOWFOAM®

MF
Waxes

Meadowfoam®
Snow Wax

WEND's Race Waxes are training and competition waxes equally committed to speed and sustainability. Carefully engineered blends of paraffin and plant-based waxes, the Race line uses higher concentrations of friction-reducing Meadowfoam® and Na-no-Technology additives for extremely hydrophobic yet biodegradable glide.

MF RACE WAXES With Meadowfoam®

MF Race waxes dial up training and race-day performance with a higher concentration of Meadowfoam® seed oils to reduce friction. The result is a wax that conditions your base and competes like a mid-fluoro, without any watershed harm.

WEND MF RACE WARM
28°F / -2°C & Above
NON-FLUORO

- Warmest conditions
- Designed for wet & artificial snow

100 gram Warm Bar
Suggested Iron Temp:
Up to 255°F / 125°C

WEND MF RACE MID
14° to 28°F / -10°C to -2°C
NON-FLUORO

- Moderate conditions
- Designed for new, mixed & artificial snow

100 gram Mid Bar
Suggested Iron Temp:
255° to 275°F / 125° to 140°C

WEND MF RACE COLD
-5° to 14°F / -21 to -10°C
NON-FLUORO

- Cold conditions
- Designed for colder, dryer snow

100 gram Cold Bar
Suggested Iron Temp:
265° to 275°F / 130° to 140°C

WEND MF RACE X COLD
-5°F / -21°C & Below
NON-FLUORO

- Extra cold conditions
- Designed for colder, dryer snow

100 gram X Cold Bar
Suggested Iron Temp:
Up to 275°F / 140°C

WEND MF RACE UNIVERSAL
10° to 40°F / -12°C to 4°C
NON-FLUORO

- Mixed conditions
- Designed for old, new and artificial snow

100 gram Universal Bar
Suggested Iron Temp:
230° to 275°F / 110° to 135°C

WEND MF Race Wax – 100g Hot Melt

FIS-compliant, fluoro-free training and race-day wax with Meadowfoam for competitive skiing and snowboarding. Extremely-fast, biodegradable and non-toxic. 100g bars.

57-212-440	Universal	pcs.
57-212-441	Warm	pcs.
57-212-442	Mid	pcs.
57-212-443	Cold	pcs.
57-212-444	XCold	pcs.

WEND MF Race Wax – 300g Hot Melt

FIS-compliant, fluoro-free training and race-day wax with Meadowfoam for competitive skiing and snowboarding. Extremely-fast, biodegradable and non-toxic. 300g blocks.

57-212-495	Universal	pcs.
57-212-496	Warm	pcs.
57-212-491	Mid	pcs.
57-212-498	Cold	pcs.
57-212-499	XCold	pcs.

1x 7"x 4"Foil Case, 1x 90g Combo Cold/Warm/Univ, 4x MF Cleaner/Conditioner Towelettes, 2x MF Liquid Juice Towelettes, 1x Ski Scraper 5mm, 1x WEND MicroFiber, 1x WEND Sticker		
57-212-616		pk.

WEND Legends Wax Kit

1x 7"x 4"Foil Case, 1x MF Performance Speed Paste 2oz Tin, 1x 90g Combo Cold/Warm/Univ, 1x MF Performance 100g Universal, 1x MF Cleaner/Conditioner 4oz Bottle, 4x MF Liquid Juice Towelettes, 1x Ski Scraper 5mm, 1x WEND MicroFiber, 1x WEND Sticker.		
57-212-615		pk.

Nano-Tech Race Waxes

WITH NANOTECHNOLOGY & MEADOWFOAM® ADDITIVES

With Meadowfoam® & Nanotechnology Additives

The ultimate in non-fluoro Race waxes, NT Race is used by Wend athletes like Tommy Ford to compete at the highest levels of World Cup racing. NT Race waxes combine our highest concentration of Meadowfoam® and Nano-Tech additives for superior hydrophobic glide. Our biodegradable, non-toxic ingredients achieve elite-level performance previously associated only with high-fluoro waxes.

WEND NT Race Wax – 100g Hot Melt

FIS-compliant, fluoro-free race-day wax with Meadowfoam and Nano-Tech additives for superior speed. Extremely-fast, biodegradable and non-toxic. 100g bars.

57-212-540	Universal	pcs.
57-212-541	Warm	pcs.
57-212-542	Mid	pcs.
57-212-543	Cold	pcs.
57-212-544	XCold	pcs.

WEND NT Race Wax – 300g Hot Melt

FIS-compliant, fluoro-free race-day wax with Meadowfoam and Nano-Tech additives for superior speed. Extremely-fast, biodegradable and non-toxic. 300g blocks.

57-212-550	Universal	pcs.
57-212-551	Chaude	pcs.
57-212-552	Mid	pcs.
57-212-553	Cold	pcs.
57-212-554	XCold	pcs.

WEND Waxes

2

FIS-compliant, fluoro-free race-day wax with Meadowfoam and Nano-Tech additives for superior speed. Extremely-fast, biodegradable and non-toxic. 1kg bulk (4 blocks).

57-212-560	Universal	pcs.
57-212-561	Warm	pcs.
57-212-562	Mid	pcs.
57-212-563	Cold	pcs.
57-212-564	XCold	pcs.

A fast, fluoro-free final coat for application after NT Race hot melt waxes. Formulated with the highest percentage of hydrophobic nanotechnology additives for blazing fast starts! 20g bar.

57-212-453 PCS.

Super non-polar, harder race prep wax for ski & snowboard competition.

Speed Boost Race Base works as a super-hard early layer before applying temperature-specific race waxes, with unmatched hardness and hydrophobic performance. A unique-to-Wend additive uses branched molecules to bring more carbon atoms, creating the ultimate non-polar base wax. With more non-polarity, more resistance to water, and more durability, Speed Boost Race Base stays effective throughout long races or training sessions even in abrasive, cold snow conditions.

WEND NT Speed Boost Race Base 100 g

Elite fluoro-free competition paste wax with **Speed Boost, Nano-Tech and Meadowfoam**. Super non-polar, harder race prep wax for ski and snowboard competition.

57-212-595	Warm	pcs.
57-212-596	Mid	pcs.
57-212-597	cold	pcs.

WEND NT Speed Boost Race Base 300 g

Elite fluoro-free competition paste wax with Speed Boost, Nano-Tech and Meadowfoam. Super non-polar, harder race prep wax for ski and snowboard competition.

57-212-601	Warm	pcs.
57-212-602	Mid	pcs.
57-212-603	Cold	pcs.

WEND Speed Boost Race Base 1kg

Elite fluoro-free competition paste wax with Speed Boost, Nano-Tech and Meadowfoam. Super non-polar, harder race prep wax for ski and snowboard competition.

57-212-605	Warm	pcs.
57-212-606	Mid	pcs.
57-212-607	Cold	pcs.

WEND Speed Sphere Race Paste 2oz Tin – Universal

Ultrafast, FIS-compliant wax with Speed Sphere, Nano-Tech and Meadowfoam. Our newest race paste combines Speed Sphere additives with our highest concentrations of Meadowfoam and Nano-Tech additives and plant-based solvents. The paste applies easily and evenly and finishes with a scrape, brush, and buff to unlock deep wax penetration, superior durability, and the elite speed benefits of the Speed Sphere technology. Use it as a primary wax after base prep, or apply over Wend's hot-melt race waxes. Fluoro-free, biodegradable, and non-toxic with ultrafast glide.

57-212-590	Speed Sphere Race Paste 2oz	pcs.
------------	-----------------------------	------

WEND Speed Sphere Race Liquid 4oz Bottle – Universal

Ultrafast, FIS-compliant wax with Speed Sphere, Nano-Tech and Meadowfoam. We developed Speed Sphere Race Liquid for the ultimate in non-fluoro race waxes, in a fast application formula for instant speed between runs. The combination of our new Speed Sphere technology with plant based solvents, wax blends, Meadowfoam and Nano-Tech additives in a liquid form provides elite podium speeds in a faster-drying liquid option. It can be used as a primary wax after base prep or applied after hot-melt race wax, but the quicker setup time makes it ideal for a quick on-hill solution or wax rejuvenation. Reapply between runs to stay just as fast throughout the day as you were at the start. Non-toxic, biodegradable, and fluoro-free.

57-212-591	Speed Sphere Race Liquid 4oz	pcs.

WEND Waxes

WEND Cube Speed Sphere Race Overlay 20g - Hot Start Rub On
Ultrafast, FIS-compliant wax with Speed Sphere, Nano-Tech and Meadowfoam. Speed Sphere Race Overlay is your final coat after applying Wend race wax. A rub-on bar designed for blazing fast speed out of the starting gate, Speed Sphere Race Overlay is quick to apply and works in a wide range of snow and temperature conditions. While these thin overlays are only designed to aid in an initial burst at the start of a race, Wend knows that a fast start can make all the difference between standing on a podium or sitting at the bottom of the leader board. Non-toxic, biodegradable, and fluoro-free.

57-212-592	Hot Start Rub On	pcs.

WEND SPECIALTY PRODUCTS

Our Specialty Products grouping includes our renowned natural cleaner/conditioners and liquid waxes.

WEND MF Natural Cleaner & Conditioner		
The 100% plant-derived cleaner thoroughly removes dirt, fluoros, grinding emulsions and other contaminants from your bases before waxing. Meadowfoam oils act as a conditioning agent to prepare your bases for a superior wax. Biodegradable and non-toxic, with no smelly petroleum solvents.		
57-212-399	4oz/120ml Squeeze Bottle	pcs.
57-212-400	16oz/500ml Spray Bottle	pcs.
57-212-431	Towelette case of 50	pcs.
57-212-401	Bulk Gallon/128 oz	pcs.

WEND MF Natural Liquid Juice

A high-performance liquid wax with Meadowfoam® seed oil, ideal for an on-hill refresh, a quick wax when traveling without an iron, or waxing in between tune-ups. This item cannot be shipped by air.

Available Air Temperature Options:

 **UNIVERSAL**
(10° to 40°F / -12° to 4°C)
Mixed conditions

 **MID**
(10° to 28°F / -12° to -2°C)
Mid/artificial conditions

 **WARM**
(28°F / -2°C & Above)
Warmest conditions

 **COLD**
(10°F / -12°C & Below)
Cold conditions

WEND MF Natural Liquid Juice – 4.5g Towelette

High-performance, biodegradable, and non-toxic liquid wax in an easy-to-use foil-packed towelette. Just rub on, let it dry and polish! 50-pack case of 4.5g (6"x6") towelettes.

57-212-468	Universal	pcs.
------------	-----------	------

WEND MF Natural Liquid Juice – 4oz Bottle

High-performance Meadowfoam wax in an easy liquid application. Biodegradable and non-toxic, just rub on, let it dry and polish! 4oz bottle.

57-212-467	Universal	pcs.
57-212-464	Mid	pcs.
57-212-465	Warm	pcs.
57-212-466	Cold	pcs.

WEND MF Natural Liquid Juice – 1 gallon Bulk

High-performance Meadowfoam wax in an easy liquid application. Biodegradable and non-toxic, just rub on, let it dry and polish! 1 gallon bulk.

57-212-406	Mid	pcs.
57-212-404	Warm	pcs.
57-212-403	Universal	pcs.
57-212-402	Cold	pcs.

WEND MF Natural Liquid Hot Box – 4oz Bottle

Formulated for deeper penetration of wax into the base, Liquid Hot Box helps revive dry bases and get maximum performance in a liquid application. 4oz bottle.

57-212-405	Universal	pcs.
------------	-----------	------

WEND MF Performance Paste Tin - Universal (12 pk)

This paste is a quick application wax formulated for speed. Using the included pad in the tin or a paper towel or microfiber towel, work the paste onto the base of your skis or snowboard. Let the paste dry for a couple of minutes, then use a clean towel to buff the paste to a shine.

57-212-430	Universal (2oz/56g) 12 Pack	pcs.
------------	-----------------------------	------

WEND SIGNATURE TEAM WAXES

Uniquely fast specialty wax products developed, tested, and used by Wend Signature Team athletes Daron Rahlves and Kazu Kokubo. Fluoro-free, biodegradable, and non-toxic.

WORKSHOP ACCESSORIES

WEND Waxes

2

WEND Daron Rahlves Signature NT Race Paste Wax

Developed with renowned American downhiller and freeskier Daron Rahlves. A high-concentration Meadowfoam® blend with Nano-Tech additives for speed, Rahlves' signature NT Race Paste is a durable, fine-film rub-on application engineered to keep you in the lead. Available in a 12-pack display case of 2oz/56g tins.

57-212-514		pcs.
------------	--	------

WEND Kazu Kokubo Signature Perf. Wax & Overlay Bar

Developed with legendary Japanese snowboarder Kazu Kokubo, this Signature Team Wax provides all-conditions versatility from a 70g performance hot melt/rub-on bar, with a 30g overlay bar for a quick on-snow refresh.

57-212-511	Universal	pcs.
57-212-512	Warm	pcs.
57-212-513	XCold	pcs.

WEND Kazu Kokubo NT Performance Speed Paste Wax

Dial up your speed on variable snow with Kazu Kokubo's NT Performance Speed Paste. Rub on the paste with its blend of Meadowfoam® and Nano-Tech additives for a quick boost on the mountain. Available in a 12-pack display case of 2oz/56g tins.

57-212-510		pcs.
------------	--	------

WEND Wax Scraper

Get the perfect scrape with the stiff flex and sharp factory edge on WEND's 4mm thick Wax Scraper. Available in two widths for skis or snowboards.

57-212-520	Ski Scraper 4mm 5 1/2 x 2 3/4	pcs.
57-212-528	SNB Scraper 4mm 11" x 2"	pcs.

WEND Air Fresheners

Rid your car or gear room of musty gear smells with WEND's bright Air Fresheners.

57-212-517	Signature Vanilla Scent	pcs.
57-212-518	Cherry Scent	pcs.

WEND Candles

Get rid of musty gear odors in your house or workplace with WEND Candles. Made from a blend of all-natural Meadowfoam® and soy waxes, WEND's Fresh Pow and Vanilla scented candles last up with 30 hours with a slow-burning wick. Hand-poured in WEND's zero-waste California facility.

WEND BIKE

Launched by Wax Research to reimagine cycling drivetrain maintenance, WEND Bike carries the same passion and commitment to delivering a faster ride without harm to the world around us. With WEND, founder John Dahl and original formulation partner Dr Hylton Murphy have teamed up again with new, reformulated wax-based chain lubes to accompany their original rub-on wax and chain cleaner for the performance cycling market.

Combining an easy, clean application with durable, long-lasting drivetrain efficiency, WEND’s new Wax-On Liquid Lubes keep your ride quiet, clean, and fast. WEND Liquid Lubes use nanoceramics instead of harmful PTFEs, for a lubricating chain wax that’s free of fluoros, solvents, dyes, and fragrances.

WEND Liquid Lube		
Get the smooth, silent speed of a waxed chain, without all the mess of melting and dipping. WEND Liquid Lubes are low-viscosity blends of paraffin wax with polyethylene wax and nanoceramics that provide effective penetration to all moving surfaces and dry to a lubricating wax film. WEND Liquid Lubes are easy to apply, deliver increased efficiency vs standard lubricants, and extend the lifespan of your chain. Simply start with a clean chain, apply Liquid Lube to each roller, let it dry, and go ride! Redesigned in 2024 for cleaner and better application, WEND Liquid Lube is available in formulas for Wet conditions, Dry conditions, and E-Duro (robust protection for the high-power demands of E-Bike drivetrains).		
57-212-570	Wet Formula 4 oz	pcs.
57-212-571	Dry Formula 4 oz	pcs.
57-212-572	E-Duro Formula 4 oz	pcs.

WEND Chain Kit – 4oz Wax-Off, 2.5oz Wax-On		
A combo kit with Wax-Off Chain Cleaner and Wax-On Chain Wax, the WEND Chain Kit keeps your drivetrain in race-ready condition. Use the Wax-Off Chain Cleaner to cut through old wax, oil, and dirt for a sparkling clean chain. Then finish your drivetrain with Wax-On's easy rub-on application for a drivetrain that stays clean, quiet, and smooth, freeing up wattage for power. The Chain Kit contains one 4oz bottle of Wax-Off, one 2.5oz applicator of Wax-On, and a WEND Microfiber Towel.		
57-212-470	4 oz Wax-Off, 2.5oz Wax-On	pcs.

WEND Wax-On Chain Wax

The original rub-on chain wax, Wax-On keeps your chain clean, while reducing friction for a quiet, smooth drivetrain. Reformulated with nanoceramic additives and biodegradable solvents for improved performance and sustainability, Wax-On performs like a hot waxed chain without all the mess. Its unique rub-on formula is easy to apply, giving you a race-ready chain in seconds.

57-212-474	WAX-ON Chain Lube, 2.5oz	pcs.
57-212-475	WAX-ON Chain Lube, 10oz BULK	pcs.

WEND Wax-Off Chain Cleaner

Do more than clean your chain with WEND Wax-Off. Wax-Off's liquid application quickly cuts through wax, oil, and dirt, while its wax additives penetrate and lube the chain. Wax-Off aids in extending the life of your drivetrain and leaves it sparkling clean in preparation for the superior speed of WEND Wax-On Chain Wax or Liquid Lube.

57-212-471	Wax-Off Chain Cleaner 4 oz	pcs.
57-212-476	Wax-Off Chain Cleaner 16 oz	pcs.
57-212-472	Wax-Off Chain Cleaner 1 Gal	pcs.

Alpine Ski Ties

78-300-224	Alpine, green, 450 x 38 mm	pcs.
78-300-227	Alpine, green, 560 x 60 mm	pcs.

Cover Band PE, 25 mm x 15 m

1 mm thick self-adhesive tape that is cut into individual lengths to cover the kick zone on waxed skis. It covers the kick zone and attaches well enough to use on manual and automated machines, even when using coarser structures. The entire base of the ski needs to be cleaned, all the wax removed, and dried before the tape is applied. The taped can be used 2 or 3 times with up to 20 passes across the stone.

56-126-230	25 mm x 15 m	roll
------------	--------------	------

Paper Tape Racing Service

This paper tape is multi-functional with a multitude of uses. Bases can be covered and protected if edges are prepared manually. During waxing the ski bindings can be protected against wax by applying the tape on the side of the ski/board. Printing forms can be attached to the ski and can be removed spotless without sticky residue.

55-500-170	1 Roll = 50 m, W = 50 mm	pcs.
------------	--------------------------	------

Infrared-Thermometer -22°C to +110°C

Pocket-size, infrared thermometer captures temperature readings of any surface-liquids, solids, and semi-solids in less than a second. Operation is simple-turn it on, point at sample, and take reading. Non-invasive, "no-touch" temperature measurements are ideal for reading accurate snow temperatures. Range is -7.0 to 230 °F and -22.0 to 110 °C with a resolution of 0.1. Accuracy is ±1 °C. Field of view is 1:1. Features include: easy-read 1/2-inch-high digital display, soft-touch keys, flip-open stand, key chain, switchable °C/°F, hold, minimum only/maximum only readings, continuously-on mode, low battery alert, and battery with 40 continuous hours of life. Size is 6,4 x 3,8 cm x 1,7 cm / 2.5 x 1.5 x 0.5 inches (L x W x H). Weight is 1 ounce / 30 g.

57-203-401		pcs.
------------	--	------

Acrylic Wax Scraper

Acrylic scraper for removing excess wax on bases and edges.

57-203-110		pcs.
------------	--	------

Plexi Scraper

Made of 1/4"/5mm thick, stiff black acrylic, these scrapers are perfect for snowboards or fat skis.

57-203-111	150 x 60 x 5 mm	pcs.
------------	-----------------	------

Plexi Scraper Alpine

To remove cooled wax from the base. After the wax has cooled to room temperature, any excess must be scraped off and the structure must be brushed. Always allow the wax and the ski or snowboard to cool to room temperature before scraping, otherwise the warm wax will be pulled from the pores, leaving the base dry.

55-200-013	130 x 60 x 3 mm	pcs.
------------	-----------------	------

Plexi Scraper Snowboard

55-200-015	320 x 70 x 5 mm	pcs.
------------	-----------------	------

Scraper Sharpener WINTERSTEIGER, 100-240 V / 50-60 Hz US

Manual resharpening of plexi scrapers can be a nerve-racking challenge after hot waxing with the wax iron. This electronic scraper sharpener sharpens scrapers quickly and conveniently, making your work more comfortable and efficient. An absolute must-have, especially for frequent waxers.

55-200-021	100 - 240 V / 50 - 60 Hz	pcs.
------------	--------------------------	------

Scraper Sharpener PLEXI SHARP

57-203-430	Scraper Sharpener	pcs.

Spare Replacement Blade

57-203-432	Replacement Blade 100 mm	pcs.
------------	--------------------------	------

SCOTCHBRITE™ Nylon Handi Pads

Extra large 6" x 9" non woven nylon impregnated with ultra fine abrasive material. Fantastic for texturing, buffing and smoothing ski and snowboard bases. Also works very well for blending P-Tex repairs into the surrounding base. 10 Pads per pack.

57-203-420	Brown, Medium, All purpose	pk.
57-203-421	Gray, Fine, extra smooth	pk.
57-203-422	White, non-abrasive, f. cleaning	pk.

WORKSHOP ACCESSORIES

Waxing Accessories

Horsehair Brush Oval

To expose the base texture with fine-grain snow.

55-500-111 210 x 90 mm pcs.

Nylon Brush Oval

To expose the base texture with coarse-grain snow.

55-500-112 210 x 90 mm pcs.

Bronze Brush Oval

Perfect for cleaning out a coarse structure before applying hot wax.

55-500-110 210 x 90 mm pcs.

Wax Brush Nylon

General purpose stiff nylon bristle brush. Perfect for wax texturing. Comes with a hang tag and sticker, packaged for retail.

55-500-016 with euro hole hanger pcs.

Wax Brush Horsehair

This is a high quality brush used for cross-country, alpine and snowboard tuning. An essential tool for the serious tuner to expose the base texture. Comes with a hang tag and sticker, packaged for retail.

55-500-078 with euro hole hanger pcs.

Wax Brush Bronze

This stiff, all-bronze base brush is perfect for cleaning out wax in a coarse structure on the base before applying hot wax. Comes with a hang tag and sticker, packaged for retail.

55-500-077 with euro hole hanger pcs.

Base Brush Fiber/Nylon

Made out of fiber and nylon, this brush is very useful for cleaning and polishing. Use the fiber side for a deep cleaning of all base structures, followed by the nylon for a fine finish.

55-500-076 120 x 70 mm pcs.

Base Brush Soft

This soft nylon brush is the ideal tool for base finishing.

55-500-079 120 x 70 mm pcs.

WORKSHOP ACCESSORIES

Waxing Accessories

RED CREEK is the leading manufacturer of rotary brushes. Save time and attain the best performance out of cross-country and alpine skis and snowboards by removing any micro fibers and exposing the stone-ground finish that may be hidden under excess wax. Roto brushes work with any standard drill electric or battery powered and the handles allow application of equal pressure across the brush for best results. Eye protection is strongly recommended with all Red Creek products.

RC Roto Brush Nylon black

All around brush. For removal and polishing of medium or hard paraffin waxes.

55-500-305 Bristle L. = 0.2x10mm, W=100mm pcs.

RC Roto Brush Nylon Grey

Used after horsehair, black nylon, or cork roller. Goes deep into the structure to remove excess wax as well as polish. General use as a final brush.

55-500-304 Bristle L. = 0.2x4mm, W=100mm pcs.

Black Fine Nylon Brush

Used after horsehair, all around brush, or cork. Goes deep into the structure to polish. Helps to remove excess additives and powders. Final brush.

55-500-312 Bristle L. = 0.12x7mm, W=100mm pcs.

White Fine Nylon Brush

Used after horsehair, all around brush, or cork. Goes deep into the structure to polish. Helps to remove excess additives and powders. Final brush.

55-500-315 Bristle L.= 0.12x4mm, W=100mm pcs.

RC Roto Brush Horsehair

High quality brush used as final pass to expose the structure and reduce static charge.

55-500-307 Bristle L. = 0.25x6mm, W=100mm pcs.

RC Roto Brush Bronze

The ideal brush to clean stone-ground skis before waxing. Also used for structuring and hard wax removal. Use single shaft with plexi hood. Max. 800 rpm.

55-500-306 Bristle L.= 0.06x10mm, W=100mm pcs.

RC Roto Brush Steel, Extra Fine

55-500-349 Bristle L.= 0.06x10mm, W=100mm pcs.

RC Roto Brush Steel, Fine

Used to open and clean the structure, can be very aggressive and should be used at speed under 1000 rpm with eye protection. Never press down while using the steel brush.

55-500-314 Bristle L.= 0.04x10mm, W=100mm pcs.

RC Roto Cork Roll

For melting additives, fluoro powder and even fluoro paraffins.

55-500-311 W = 100 mm pcs.

RED CREEK Felt Roller

For melting additives, fluoro powder and even fluoro paraffins.

55-500-325 W=100mm pcs.

RC Roto Brush Nylon, for Snowboards

Used as a final step. Removes excess pure fluorocarbon additives with very good results.

55-500-308 Bristle L. = 0.12x4mm, W=300mm pcs.

Ultracam

ULTRACAM UP and ULTRACAM STAR

The latest boot fitting tools for adjusting fit in the forefoot, heel, instep and ankle areas!

ULTRACAM, long recognized as the leader in the simple, effective customization of footwear, introduces their latest offerings - the ULTRACAM UP and ULTRACAM STAR. Mechanical stretching coupled with precision thermal controls allow the comfort of new and existing ski boots to be maximized at the time of purchase or during return visits. With varied types of plastics presenting adjustment issues, fitters using the UP and STAR tools can confidently and quickly alter forefoot, heel, instep, ankle, and toe areas with permanent results. As always, the most recent tools from ULTRACAM also work with inline, ice, and hockey skates, as well as most trekking and hiking shoes

Convey an Authentic Fitting Experience..

With personalized fitting on the sales floor, retailers showcase professional competence to customers. Seeing the process often sparks interest from additional customers.

ULTRACAM UP. The Expansive Expander.

Comprehensive device with one forefoot press and one ankle press; can be upgraded by adding a second forefoot press. Separate controls for temperature and time simplify operation. The optional aircooling cuts the cooling time in half – increasing service margins and customer satisfaction.

ULTRACAM STAR. The Standalone Specialist.

For the first time, the ankle/mid-foot press unit is offered as a detached tool. All fit adjustments required in the forefoot and ankle area can be made with this device. The combination of separate controls for temperature and time, new articulating arm, and the optional aircooling allow precise, complete work in an efficient manner.

AIRCOOLING. Spend a little - save a LOT.

Cooling time of footwear processed on ULTRACAM has been a significant part of the total processing time. With the new aircooling set, this “waiting time” can be cut in half. The aircooling set offers quick cooling to four ULTRACAM UP or ULTRACAM STAR tools at one time when connected to an adequate compressed air supply.

ULTRACAM UP Basic (1Stretch+1Ankle Arm)

One Forefoot Press and one ankle Press, each with two separate control units for time and temperature. Including 3 pairs of lasts, 8 pcs. expansion adapter, measuring gauge and premounted valves for compressed air cooling.

Watch video now:

3 EASY STEPS TO THE PERFECT FIT.

Here's how you can find the perfect fit with the ASC concept for every customer quickly and easily.

ANALYZE

There are six different analysis devices to choose from that determine the foot type, length, width and other data concerning customer's feet. From the three-dimensional representation of both feet using the ER_WIN 3D FOOT SCAN to the quick and easy-to-use Feet View, we offer the following devices for foot type analysis: ER_WIN 3D FOOT SCAN, 3D SCANNER VANDRA, PODO EASY, FEET VIEW, FMD and BRANNOCK.

SELECT

Once the foot type has been determined, it is easy to find the appropriate insole and suitable Power Fit socks. Choose the product that is going to meet the customer's requirements for their sport or activity, whether it's skiing, snowboarding, hiking, running or working, and so on.

CUSTOMIZE

Regardless of whether they're Step-In, Fusion or 3D Custom, all insoles can be custom molded and fitted precisely to the foot of a customer through heating.

The following devices are available for customizing insoles:

- Heating
 - 3D HEATER
 - SPEED HEAT DIGITAL 3L
 - HEAT GUN
- Fitting
 - AUTOFIT BT
 - VAC IV ELECTRIC
 - PILLOWS 13

Tools and Accessories

EDDY Heat Gun

The Mark IV Eddy Heat Gun is the best we have found for boot repair and other shop uses.

Featuring:

- 500 # 700 degree heat range
- 110 V, 12 A
- Made with strong heavy duty GE lexan material
- Built in circuitbreaker protection

Vital Oxide

Vital Oxide is our environmentally friendly Disinfectant Cleaner and Odor Remover which is great for everyday disinfecting and sanitizing. Vital Oxide is super effective at killing mold, mildew, bacteria, and viruses and eliminating odor. Kills 99.9% of bacteria and viruses, kills fungus, mold, and mildew at the source and inhibits growth, sanitizes 99.999% of bacteria on food-contact surfaces with no rinse required, and eliminates odor at a molecular level, not by masking with fragrance. Vital Oxide is a Hard Surface Disinfectant and Soft Surface Sanitizer.

- **Vital Oxide has been approved by the EPA for general use against SARS-CoV-2, the coronavirus that causes the Coronavirus Disease 2019 (COVID-19). Follow the directions on the label for use against Norovirus, Feline Calicivirus** and Canine Parvovirus (Strain Cornell-780916, ATCC VR-2016**) on hard, non-porous surfaces.**
- Full strength and ready to use
- On hard surfaces, for disinfection, apply at full strength and leave for a 10-minute dwell time.
- On soft surfaces (Helmets and Boots), for sanitization, apply at full strength or up to a 5:1 dilution. 5 parts water:1 part solution. There can be bleaching so to be safe, do a color test if desired. Leave for a 60 minute dwell time.
- EPA-registered hospital disinfectant with lowest toxicity category—gentle enough for daily disinfecting and sanitizing
- NSF-registered "no rinse on food-contact surfaces" sanitizer
- Heavy duty odor eliminator—gets rid of bad odors by attacking the source of the problem, not by masking
- Soft-surface sanitizer
- Hypo-allergenic
- No volatile organic compounds (VOCs)
- No harsh chemicals, non-irritating to skin, no nauseous fumes

Innovation V-Edge For the ultimate skiing experience.

2

Edge grinding in particular is revolutionized by the new generation of Jupiter automated machines. The new V-Edge function grinds side and base edges along the ski length in the front and rear areas with variable angles. This results in a perfect combination of optimum edge grip and easy control of the ski. This increases the skier's fun and enhances their safety, meaning perfection for everyone, from leisure skiers to racers. V-Edge-ground skis deliver an entirely new skiing sensation, which you have to experience for yourself to understand this revolutionary technology. Thanks to its digital networking, the Jupiter is able to automatically recognize skis and compare them with the data stored in the Easyrent rental software. The Jupiter then automatically activates the appropriate or saved edge grinding parameters. Alternatively, a QR code applied to the ski is scanned. The benefit in both cases: Automatic ski recognition results in individual edge grinding without manual intervention. In the Jupiter M/L machine version, a hand-held scanner is used for ski recognition.

www.vedge.ski

Ski recognition with Easyrent connection.

- Skis are assigned to a category (Comfort, Sport, Race) in Easyrent.
- The Jupiter scans the Easyrent EAN code.
- The edges are perfectly ground depending on the category.
- Individually changed edge parameters are stored in Easyrent and are therefore precisely reproducible. Every ski is unique!

Ski recognition without Easyrent connection.

- Each ski is labeled with a durable QR code sticker, with a unique code for each of the 3 categories Comfort, Sport, or Race.
- The Jupiter reads the QR code and the edges are perfectly ground depending on the category.

Scout 2

Automation for tight spaces

Small service workshop, but big automation dreams? You can use the WINTERSTEIGER Scout service station to replace cumbersome manual work with automation technology – even in the smallest of spaces. It has a compact design and comes equipped with the WINTERSTEIGER technology highlight Ceramic Disc Finish, ensuring that your Scout service station will provide a high-performance ski service while making your business stand out. It comes with a new 12.1" large touchscreen as well as a faster processor with more memory for a higher operating speed.

Water Cooler with Thermo Chiller

At service machines this cooling device (optional and retrofitted) for secures a stabile temperature of the grinding water. With this thermo chiller, WINTERSTEIGER provides a new and user-friendly cooling concept. Your benefits summed up: a continous water temperature ensures continous grinding results, longer life time and changing intervals of the grinding water, less bacterial growth, less emulsion consumption and a lower wear of the grinding stones and diamond dressers. Practical: The installation of the heat exchanger on the top of the water tank allows an easy cleaning of the water tank.

Cooling Additive 1,5 lt. for Thermo Chiller

Pure water can freeze in the cooling circuit and cause malfunctions. Therefore, the cooling circuit of the thermo chiller and heat exchanger has to be filled up with this coolant and water in a mixing ratio of 1:1. The coolant prevents the freezing of the circulating medium, it protects against limescale and corrosion. 2 pcs. each of the coolant additive art.no. 76-400-142 (= 1.5 lt.) are supplied per heat exchangerart. We recommend draining and disposing of the circulating medium in the cooling circuit at the end of the winter season. The cooling circuit has to be refilled at the beginning of the next winter season.

76-400-142	1,5 lt. can	pcs.

Base Repair

Polyethylene Wire 1,5 kg Standard

Baseman uses 55-560-160 or 55-560-161.

Basejet, Polyjet 80/100/120/130

55-560-106	Ø 3mm, 1,5 kg, clear, soft	pcs.
55-560-107	Ø 3mm, 1,5 kg, black, soft	pcs.
55-560-109	Ø 3 mm, 1,5 kg, graphite, soft	pcs.

Polyethylene Wire 1,5 kg with Lemon Scent

This polyethylene wire with smell lemon contributes to a pleasant climate in workshops. Exclusively available at WINTERSTEIGER!

Basejet, Polyjet 80/100/120/130

55-560-150	Ø 3mm, 1,5 kg, clear, soft	pcs.
55-560-151	Ø 3mm, 1,5 kg, black, soft	pcs.
55-560-152	Ø 3mm, 1,5 kg, graphite, soft	pcs.

Polyethylene Wire 0,25 kg with Lemon Scent

This polyethylene wire with smell lemon contributes to a pleasant climate in workshops. Exclusively available at WINTERSTEIGER!

Baseman

55-560-160	Ø 3 mm, 250 g, clear	pcs.
55-560-161	Ø 3 mm, 250 g, black	pcs.

Polyethylene Wire 0,4 kg

The most desired, high quality, low density, pure polyethylene base repair on the market today. Specifically designed for use in Wintersteiger, Skid, Montana and Monty Jr. extruders. For Baseman use only 55-560-160 or -161.

Polyman

55-560-100	Ø=3mm, clear, hard	pcs.
55-560-104	Ø=3mm, clear, soft	pcs.
55-560-110	Ø=3mm, black, hard	pcs.
55-560-115	Ø=3mm, graphite, hard	pcs.
55-560-116	Ø=3mm, black, soft	pcs.

Polyethylene Wire 3,5 kg for MONTANA Machines

MONTANA MRS2000+GSA2000

55-560-340	Ø 5 mm, 3,5 kg, clear	pcs.
55-560-341	Ø 5 mm, 3,5 kg, graphite	pcs.

Grinding Belts

WINTERSTEIGER: Best Belt Quality.

Red Tuning Belt.

The tuning belt's properties mean it can be used for a wide range of applications. For pregrinding, the belt only needs to be broken slightly, which enables a very good and fast removal of polymaterial without sticking by using a high belt speed (rpm). If the belt is broken more, it is ideal for use as a tuning belt at low speed and with low grinding pressure. This means only the peak structures are touched and fiber-free grinding can be achieved. Another advantage of the tuning belt – which consists of a mixed ceramic and corundum grit – is its high dimensional stability and long lifetime. The integrated connecting foil, which is patented, does not protrude at the joint and thus ensures an even finish.

Tip: Depending on the application, break less for pre-grinding and more for tuning.

Note: Sufficient water cooling required.

Blue Grinding Belt.

This zirconium corundum grinding belt has a very high quality and flexible return idler, as well as synthetic abrasive grain with controlled breaking behaviour. This breaking behaviour means that the abrasive grain repeatedly produces new grinding edges on the grain. The belt has a long lifetime and the grinding result is very good on the base, as well as on the edge (base and side edge). The belt needs to be slightly broken before first use. The last part of the item number corresponds to the belt grain: XX-XXX-080,-100,-120,-150,-180

Tip: Fast band speed increases the material removal.

Caution: Ensure adequate cooling.

TrizactTM Grinding Belt.

The pyramid shaped arrangement of the abrasive grain gives the Trizact grinding belt a longer lifetime and enables an even and fibre free result (structural grind), as well as very fine edge tuning. However the material removal is less than with the red tuning belt. This belt is ideal for snowboards, which, due to their shape (concave or convex), cannot be ground on the stone perfectly. The belt needs to be broken lightly before first use.

Tip: Only slight contact pressure and good cooling required.

Scotchbrite Belt (Waxing and Deburring Belt).

This belt is suitable for wet and dry operation and can be used for deburring, polishing and cold waxing (only dry process) in one work step. The belt has a low belt extension due to the reinforced nonwoven fibrous web and is particularly resistant to tearing and thus has an enormous lifetime. Caution: For dimensions 350 x 1300 mm and 350 x 2000 mm on machines with selfcentering idler wheel (from year of manufacture 2000), we recommend the use of a top quality belt type (with reinforced belt back).

Tip: Slow belt speed.

Moonflex Diamond Belt.

The special Moonflex grit enables an enormous lifetime of these side edge belts (more than 2000 pairs). Usage: grain 400 and 600 as tuning belt for very fine edge tuning, grain 060 and 120 as pregrinding belt for the discovery P-module.

Cork Finishing Belt.

For use after edge tuning. Fine hairs on the base are removed by using a lot of water, little pressure and low belt speed. A smooth and fibre free base is produced. This belt is mainly used for finishing and needs to be broken accordingly.

Tip: Slow belt speed.

Material Lift and Stone Lifting Device

Aids lifting of the 50 kg Jupiter Stone from the box to be installed in the machine. Lifts the stone directly from the shipping container and swivels 90° where the stone is then pushed directly onto the Jupiter stone shaft. Device consists of 2 separate components which are delivered separately and assembled on site.

MACHINE ACCESSORIES

Diamond Technology

Diamond Technology

The dressing diamond is used to cut the desired structure into the grinding stone. Don't dress dry with synthetic diamonds - Risk of glowing out! (Glowing out: Diamond needles may splinter due to overheating) To get the perfect diamond set up for your needs, feel free to contact our experts from WINTERSTEIGER customer service.

Explanations

Relevance of the "Total bearing surface": The total bearing surface is the sum of the diamond cross sections. The higher the total bearing surface is, the more resistant the diamond. This also increases the lifetime.

Differences of Structures

Accessories for Matrix NC

Designed for Racing

The Matrix NC race grinding machine creates structures and surfaces that let ski racers determine exactly who benefits from these hundredths of seconds. So they can take control over those fine margins that ultimately make all the difference.

wintersteiger.com/matrixnc

The advantages:

- Adaptable to various needs thanks to modular construction
- Extensive configuration options
- Wide range of options available
- High-precision grinding force adjustment, either electronic or pneumatic
- Dynamic process for balancing grinding stones directly on machine
- Intuitive operation using integrated touch panel or external PC
- Integrated stone management
- Integrated level control for stone aggregate

Nordic

- Equipped with choice of 1 x 70 mm (1 x 2.8"), 2 x 70 mm (2 x 2.8") or 1 x 150 mm (1 x 5.9") stone
- Comprehensive selection of stones and diamonds for Nordic requirements
- Stone available with twin structure (150 mm, 5.9" stone)
- Centerings adapted for Nordic
- Suitable for ski jumping

Alpin

- 150 mm, 5.9" stone for Alpine
- Comprehensive selection of stones and diamonds for Alpine requirements
- Centerings adapted for Alpine
- Up to 16 substructures across the entire width of the stone
- Extensive structure pool available

The unbeatable variety of structures at Matrix NC

On the next pages you will find a huge selection of dressing diamonds and grinding stones for race service. Therefore, the Matrix NC offers an unbeatable variety of structures. Up to 16 substructures can be generated across the entire width of the stone. You can see some structure examples at the following pictures below.

MACHINE ACCESSORIES

Grinding Stones Racing

Grinding Stones Racing

Grinding Stones for Matrix NC/ Race NC

Art.No.	Designation	Description	Width	Unit
Grinding Stones 70 mm wide				
56-200-363	Grinding Stone Ø=350mm W=70, greybrown	Medium-hard quality with very fine grain and high porosity; mainly for very fine and smooth structures (finer than -361) at XC skis.	70 mm	pcs.
56-200-361	Grinding Stone Ø=350mm W=70, blue	Grinding stone with medium-hard quality and medium grit size as well as lower porosity compared to type 56-200-365.	70 mm	pcs.
56-200-364	Grinding Stone Ø=350mm W=70, white	Harder quality, primarily suitable for linear and fine structures; offers rather low removal rate due to lower porosity.	70 mm	pcs.
56-200-362	Grinding Stone Ø=350mm W=70, turquois	Fine, dark green grinding stone with silicon carbide grit (SIKA), for very fine and deep structures.	70 mm	pcs.
Grinding Stones 150 mm wide				
56-200-373	Grinding Stone Ø=350mm W=150, greybrown	Medium-hard quality with very fine grain and high porosity; mainly for very fine and smooth structures at cold and dry snow conditions.	150 mm	pcs.
56-200-371	Grinding Stone Ø=350mm W=150, blue	Grinding stone with medium-hard quality and medium abrasive grain as well as lower porosity compared to type 56-200-375.	150 mm	pcs.
56-200-374	Grinding Stone Ø 350mm W 150, white	Harder and finer grinding stone for low roughness depths and low removal rate, recommended for cold, frozen artificial snow.	150 mm	pcs.
56-200-372	Grinding Stone Ø=350mm W=150, turquois	Fine, turquoise-colored grinding stone with silicon carbide (SIKA) grit, for very fine and deep structures, particularly suitable for jumping skis and less suitable for alpine skis.	150 mm	pcs.

Ceramic Disc Finish

State-of-the-art Ceramic Disc grinding.

The unique Ceramic Disc Finish technology grinds high precision edges – from the first ski to the last. Perfected by WINTERSTEIGER for 25 years, it is now firmly established and „state of the art“ in ski production, racing, and ski service.

Your benefits summed up:

- Precise edge geometry, exact edge angles, flat surface, high repeatability – all this from the tip to the tail of the ski.
- Self-sharpening grinding disks for uniform material removal and a consistent grinding pattern throughout the entire service life.

Ceramic Disc without Flange Ø 154 x 40 mm

Art.No.: 56-220-054

	Consistency

pcs.

Abrasive stone Jupiter Ø 16 x 55 mm

For cleaning and truing of the ceramic discs with the dressing function of the Jupiter machine.

Jupiter

55-240-148 Ø 16 mm x 55 mm

pair

Insert - beveled - Jupiter Trim Cut

The automatic ski service machine „Jupiter“ from WINTERSTEIGER features the new automatic sidewall removal device "Trim Cut". The chamfered inserts used for this purpose can be turned by 180° after wear has occurred. If both sides are worn, the insert can be easily replaced by the operator. In that case, both inserts of the Trim Cut device should be replaced.

Jupiter

56-250-010 1 pair

pair

Torx screw M5 X 12 (for art.no. 56-250-010)

Replacement screw for the chamfered insert (56-250-010) of the "Trim Cut" sidewall planer. For one pair of inserts, 2 pieces of this screw are needed.

Jupiter

56-251-010 1 pc.

pcs.

Multigrain Diamond Ø = 15 mm, Trimjet 2

Doublesided diamond bit to clean the ceramic discs at Trimjet 2 with central support. 2 pcs. needed per machine.

Trimjet 2

56-200-146 Ø 15 mm

pcs.

Sidewall Planer Ergo Razor

To remove sidewall material. The ERGO RAZOR sidewall planer is essential to prep for side edge filing as it is common for a file to be compromised by cutting into the sidewall of a ski. It is very important to remove the sidewall material to avoid loading files with plastic and to keep the sidewall from interfering with the bevel on the edge. The razor has an ergonomic design that fits into the palm of the hand. It is adjustable and can be used with both the right and left hands. It comes with a round cutting blade (packaged for retail).

57-401-100

Sidewall Planer

pcs.

Produce an edge that is perfectly polished!

Precisely tailored to the disc module, the polishing module gives the base edge the final finish. The result is a visibly and physically perfect edge without any need for additional finishing.

Your benefits summed up:

- Final polish for the perfect base edge, the ideal complement to the disc module
- Perfectly polished from tip to tail
- Partial or complete polishing
- Visually outstanding result, leaves nothing to be desired

Polishing Disc Ø 250, W = 50 mm

Art.No.: 56-200-504

	Consistency	
Soft		Hard
	Material removal performance	
Low		High
	Grinding Pattern	
Fine		Coarse

Recommendation

Our Bestseller!
All-purpose Polishing Disc
Standard for Jupiter, Discovery 2 and Mercury

Polishing Disc Ø 250, W = 50 mm

Art.No.: 56-200-505

	Consistency	
Soft		Hard
	Material removal performance	
Low		High
	Grinding Pattern	
Fine		Coarse

Recommendation

Longer lifetime
Ideal for fine-tuning

Polishing Disc abrasive Ø 250, W = 50 mm

Art.No.: 56-200-507

	Consistency	
Soft		Hard
	Material removal performance	
Low		High
	Grinding Pattern	
Fine		Coarse

Recommendation

Very constant, but matt grinding pattern
Higher Material removal performance
Can also be used without disc pregrinding

Polishing Disc Ø 250, W = 65 mm

Art.No.: 56-200-514

	Consistency	
Soft		Hard
	Material removal performance	
Low		High
	Grinding Pattern	
Fine		Coarse

Recommendation

All-purpose Polishing Disc
Standard for Scout sdp

Polishing Discs for Polishing Module

To polish the tip and tail areas for an optically perfect base edge.

Discovery 2, Jupiter, Mercury

56-200-504	Ø 250 mm, W = 50 mm, soft	pair
56-200-505	Ø 250 mm, W = 50 mm, hard	pair

Polishing wheel, abrasive Ø 250 mm, W = 50 mm,

Compared to type Art.No. 56-200-504, this polishing disc allows more removal of the edge material. In case of reduced quality requirements, the base edge can be processed with only one polishing grind (without previous disc grind). This increases the throughput capacity.

Jupiter

56-200-507	Ø 250 mm, B = 50 mm, abrasive	pair
------------	-------------------------------	------

Polishing wheel soft Ø 250mm, W=65mm

To polish the tip and tail areas for a optically perfect base edge.

Scout sdp

56-200-514	Ø 250 mm, W = 65 mm, universal	pair
------------	--------------------------------	------

Diamond dresser square 1x0.6x0.6x4mm

For dressing the polishing discs.

Discovery 2, Jupiter, Mercury, Scout sdp

56-200-220	1 x 0,6 x 0,6 x 4 mm	pcs.
------------	----------------------	------

Dynamic Bridge

Carbon binding bridge: super light, takes care of your back.

Weighting in at only a few grams, the Dynamic Bridge weighs less than half that of a conventional binding bridge. This means less wear and tear on your shoulders and back. Compared to using conventional bridges, you lift one or two tons less per day (calculation based on 6 passes per single ski, considering 30 – 50 pairs of skis).

Complete product range.

The complete product range with 5 models – three sizes for alpine ski, one model for cross-country and one for racing skis used with a binding plate – makes the Dynamic Bridge a universal tool: Bridges suitable for every kind of ski.

Your benefits summed up:

- Light weight makes work easier
- Quick and extremely simple to handle
- Continuous contact pressure for precise grinding results
- High stability of the binding bridge at the ski thanks to large contact surface

Adult skis (Art.No.: 56-190-200)

For skis with a minimum length of 145 cm.
Weight: 860 g

Medium (Art.No.: 56-190-280)

For skis with a minimum length of 110 cm.
Weight: 665 g

Child skis (Art.No.: 56-190-220)

For skis with a minimum length of 100 cm.
Weight: 590 g

Race (Art.No.: 56-190-290)

For racing skis without mounted ski binding. Suitable for every binding plate with rubber cushion and velcro strip fixation.
Weight: 650 g

XC (Art.No.: 56-190-240)

For cross-country skis. Easy fixation of the bridge at the binding.
Weight: 410 g

Binding Bridges

Binding Bridge Carbon Universal, Super Light

Extremely light binding bridge with 860 g weight to use without dummy sole. Suitable for alpine and telemark skis with a minimum length of approx. 145 cm.

56-190-200 L = 1330 mm pcs.

Binding Bridge Carbon Medium, Super Light

Extremely light binding bridge with a weight of only 665 g. For medium skis with a minimum length of approx. 110 cm.

56-190-280 L = 1070 mm pcs.

Carbon Binding Bridge f. Children Skis, Super Light

Extremely light binding bridge with a weight of only 590 g. For junior skis with a minimum length of approx. 100 cm.

56-190-220 L = 930 mm pcs.

Binding Bridge Carbon Race, Super Light

For racing skis without mounted ski binding. With rubber cushion and velcro strip fixation, suitable for every binding plate.

56-190-290 L = 1200 mm pcs.

XC Bridge Carbon, Super Light

Extremely light weighted binding bridge with 410 g weight, with metal bar to attach to the binding. NEW: also suitable to bindings with Rottefella MOVE™ System.

56-190-240 L = 1060 mm pcs.

64-140-889	Spare retainer, green	pcs.
------------	-----------------------	------

General Workshop Accessories

Non-Aerosol Silicone Spray

Non-Aerosol Lubricant, Type Food Grade Silicone, same usage as 57-202-599 but without hazardous charges.

57-202-598	16 oz.	pcs.
------------	--------	------

SSL Silicone Release Spray

Slide Silicone Spray is the best on the market and is ideal for use on ski bindings, boots and any application around the shop where lubrication is needed. Ground ship only!

57-202-599	Large 16 fl. oz. can	pcs.
------------	----------------------	------

Snowboard Squeege

Used for cleaning ski or snowboard bases as they come off the grinder. Choose from 7" blade for skis or 12" blade for snowboards.

57-202-101	7" blade	pcs.
57-202-102	12" blade	pcs.

Base Cleaning Cloth

We started using this microfiber cloth from 3M at the shows to clean and dry the machines. It works really well and we didn't have to use any cleaning agents that may contaminate the grinding fluid. One of our technicians started using it to dry the skis/boards after grinding and found it removes the small microfibers left by the stone. It is really amazing to see the job it does in trapping even the smallest polyethylene fibers. It is machine washable and can be used over and over again.

57-202-010	12" x 14"	pcs.
------------	-----------	------

One Hand Grease Gun

The construction allows a single hand operated lubrication for an easy work in restricted areas.

70-140-156	Grease Gun with hose	pcs.
76-320-141	Heavy Duty Grease 400 g	pcs.

Grease Gun + Grease for TRIMCUT-Module JUPITER

The Trimcut-module of the JUPITER grinding machine has to be lubricated regularly (weekly). A special grease gun and another lubricating grease type is required for this module. The connector means the extension tube at the front end the grease gun and is not included at art. No. 70-140-158.

Jupiter

76-320-148	HQ-Lubricating Grease 400 g	pcs.
70-140-158	One hand grease gun 130 ccm	pcs.
12-700-219	Connector grease gun	pcs.

Fluid Management

For a healthy workplace and environment.

The fluid management system from WINTERSTEIGER supplies complete information for testing water and waterbased lubricating coolants. Offering a wide range of services for optimal testing, especially important for WINTERSTEIGER emulsion (lubricants, cleaning solutions, etc.).

Thus the industrial safety and industrial laws are followed. Providing a healthier environment for everyone. This modular system offers one custom made solution for all ski and snowboard service workshops, and is first of this kind on the market.

WINTERSTEIGER health-tips

Since lubricating coolants contain many different chemicals, the following preventive measures are recommended:

- Using suitable protective clothing
- Using suitable protective gloves
- Using suitable skin protection
- Do not rub or touch nose, mouth or eye area with dirty hands
- When skin comes in contact with lubricating coolants it should be immediately rinsed
- Thorough cleaning of the hands before meals, toilet attendance, before work breaks and after completion of the activity
- Be sure to clean all parts of the body that have come in contact with lubricating coolants at the end of the work day with warm water and mild, non-scrubbing detergents
- Afterwards apply skin creme to washed areas, as skin tends to dry out easily after being in contact with so many chemicals

Recommendation: Aeration and ventilation of workshops with Grinding Machines due to the resulting emulsion vapor During operation of the grinding machines an emulsion vapor (cooling lubricant vapor) is created during the process. On manual grinding machines the removal of the vapor mist can be accomplished by proper ventilation and filtering of workshop air. On automated grinding machines the removal of the vapor mist is can accomplished by proper ventilation and filtering of workshop air or by extraction of the coolant vapor from the grinding machine using a vapor and air purifier filter.

The operator of a workshop has the responsibility that workshop and operation is in compliance with all valid legal regulations in regards to accident prevention, workplace and environmental rules (and other applicable regulations). Thus we recommend that planning, dimensioning and installation of an aeration, de-aeration and ventilation system is performed by a local qualified ventilation company. For the material selection of the aeration system the recommendation of the OSHA Metalworking Fluids Standards Advisory Committee have to be obeyed. More information can be found at the following website www.osha.gov/dhs/reports/metalworking/MWFSAC-FinalReportSummary.html

Technical information on the installed grinding machines in the backshop room like air flow per hour can be provided by WINTERSTEIGER in order to ensure the appropriate sizing of the exhaustion.

Spare Filter for Vapor Filter

For Emulsion Vapor. Should be changed once or twice a year.

20-116-544	For Discovery PS/SS, Microjet	pcs.
------------	-------------------------------	------

Emulsion Pro-Tec B550

Fully synthetic abrasive coolant with extended long term stability for automated machines.

Please note:

- Mixingratio: 3 - 4 %
- Calculation factor for the refractometer: 2.7Concentration in % = refractometer value (°brix) x 1.7; e.g. with areading value of 2.0 on the refractometer the mixing ratio is 3,4 %;

55-645-304	10 kg can	pcs.
55-645-294	50 kg barrel	pcs.

MACHINE ACCESSORIES

Fluid Management

Premium Synthetic Emulsion

New premium synthetic emulsion developed for the aviation industry. It's excellent grinding properties and inhibits rust and corrosion. A nonstaining, low foaming formula with no nitrated additives. Works well in hard water.

57-202-615	Mix Rat. 1%, 1 Gal, H ₂ O Soluble	pcs.
57-202-616	Ratio 1%, 55 Gal., H ₂ O Soluble	pcs.

Biodegradable Emulsion

Biodegradable grinding coolant for use with all manual stone and belt grinders. Non-foaming. No oily residue. Non-flammable. Fights rust. Less heat build up. Removes oil and grease. Dilute 40-1 with water. Do not mix with other grinding solutions. Concentrated and economical!

57-202-610	Mixing Ratio 1:40, 1 Gallon	pcs.
57-202-611	Mixing Ratio 1:40, 55 Gallons	pcs.

5

Grinding Fluid Disposal

With ever more awareness of our lasting effect on our planet, it is imperative that used grinding fluid is disposed of properly. Depending on the type of emulsion used and the area in which you live the method of disposal varies. One fact still remains; it is not an acceptable practice to just dump it out the back door. In some areas of the country, depending on your local water municipality, the disposal of the biodegradable emulsion may be as easy as separating the solids out and diluting the mixture further with fresh water and pouring down the drain. To find out if this is the case in your area, simply take two samples, one straight from the tank and another diluted with a known quantity of water, along with a copy of the MSDS to your local municipality to be tested. Make sure there are no solids or anything floating in the mixture. After the test they will let you know what steps you should take. In the case of the mineral oil, synthetic, or silicone based emulsion the used fluid will need to be stored in a containment vessel such as a 55 gallon drum to be picked up by a licensed waste disposal company.

There are several things you can do to prolong the life of your grinding fluid such as:

1. Making sure the emulsion is incorporated into the water properly by using a mixer and refractometer.
2. Keep the grinding fluid clean by keeping the filter medium clean.
3. Top off the tank with premixed fluid instead of fresh water to keep the ratio correct.
4. Maintain the grinding fluid using the Pro-Tec Analysis Kit.
5. If the machine isn't going to be used daily turn it on and let it run for 30 minutes with the gate valves open to aerate the water, this will prevent the mixture from "souring".

NEW

Emulsion Mixer TEFEN Mixrite 0,5-5% with Wall Socket

With this new mixer, an inserted piston motor ensures a continuous mixture of the emulsion with the beginning water, independently of possible throughput and pressure fluctuations in the water net of the inlet. Additionally the mixer can be adjusted within the range of 0,5 % to 5 % to the necessary mixing ratio. The accessories of this mixer contain: wall support, transparent hose 2m with filter and ballast weight (to place into the emulsion barrel), connection hose (length 2m) to the water tank. The necessary supply hose to the mixer must be provided by the customer, and the pressure in the supply line to the mixer must be between 2 and 6 bar. Together with the calculation software for Jupiter, Scout, Discovery, Mercury and Tunejet for easy determination of the mixing ratio of the required emulsion concentration, this mixer enables convenient dosing and refilling of the emulsion, significantly easing the workload for the user.

7019-1011-V02 Mixing ratio 0,5 - 5% pcs.

Manual Drum Pump for emulsion barrels

Suitable to the metal emulsion barrel with a 2" internally threaded hole: 55-645-294 / Pro-Tec B550. With a costless adaptor the pump is also useable with the barrel 55-645-274 / Pro-Tec B370.

- Flow Rate: 25 lt. / min
- Length of the immersion tube: 880 mm

55-645-385 H = 1050 mm pcs.

Barrel-Opener, galvanized

For 3/4" and 2" caps at emulsion barrels.

8570-0811-100 300 x 45 x 38 mm pcs.

Refractometer

To check the mixing ratio of the emulsion in the water tank. Important in each workshop.

55-645-245 pcs.

MACHINE ACCESSORIES

Fluid Management

Pro-Tec B358 Analysis Kit with Refractometer

Enables the scrutiny and measurement of lubricating coolants as well as the documentation of the results of your measurement. This kit consists of: 1 pc. hard case. 1 set of 55-645-342 Pro-Tec B 360 combi test strips (100 pcs.) for the determination of ph-value, nitrite-value and water hardness, 1 pc. refractometer 55-645-245, 1 set of paper tissues, 1 pc. pipette, 1 pc. waterproof marker, 2 pcs. measurement charts, 1 handling and measuring instruction.

Machine Cleaning Agent 1 lt. with Spray Pump

Special anticorrosive cleaning agent. Cleans and protects all machine parts made of coated sheet metal or iron, or of aluminium, chrome, or plastic.

7019-1011-V01	1 lt.	pcs.
---------------	-------	------

Simple Green Crystal Cleaner

Crystal Simple Green Industrial Cleaner and Degreaser is a powerful, industrial-strength cleaner and degreaser formulated for critical cleaning applications that demand high performance from a fragrance and color-free solution. This highly-trusted cleaner utilizes a non-flammable and biodegradable formula, making it the ideal cleaning solution for a variety of industries where sanitation and safety are of equal concern. Great for cleaning the painted surfaces of your machine, water tanks, pumps, and as an all-around shop cleaner.

57-225-130	24 oz Simple Crystal Cleaner	pcs.
57-225-131	1 gal Simple Crystal Cleaner	pcs.

Pro-Tec G 254 System Cleaner 1 lt.

For the disinfection of the machine caused by spoiled emulsion. Recommended concentration: 1 – 3 % (10 - 30 g/l.). Thereafter, the cleaner should remain in the system for 4 – 8 hours. During this time, work may be continued as usual. Foam may build up on some machine types. When no service is being performed with the machine, the abrasive coolant, which has been enriched with the system cleaner, should be constantly kept in motion.

55-645-368	1 lt.	pcs.
------------	-------	------

Note the following recommendation for the correct application of the system cleaner Pro-Tec G254 and biocide parmetol MBX depending on the water tank capacity of your machine.

Machine	Volume of Water Tank	Quantity of System Cleaner	Quantity of Biocide
Matrix NC	210 lt.	3,2 lt.	0,21 lt.

The WINTERSTEIGER Webshop

Order accessories comfortably on the Internet.

The WINTERSTEIGER webshop provides a platform where you place orders, gain information about WINTERSTEIGER Products along with information from past orders, deliveries, and invoices. Ordering online offers you the ability to place orders when it is convenient for you, 24 hours a day, every day.

Registered users can download Safety Data sheets and user manuals as they shop at the site. You will also find all of the latest products available at the webshop, new products are listed on the webshop before the printed catalog.

You can easily search and compare product as well as see availability and delivery times. You can also shop stones, belts and diamond bits by your machine type, helping to ensure you are buying the correct sized materials.

Your way to registration!

- To register at the new site simply go to wintersteiger-shop.com
- Choose the Accessories Ski Service Rental US/Canada shop
- At the top of the next page click Logon and then Registration
- Follow the registration process, filling out all the needed information and click CONFIRM at the summary of the entered information.
- After we review your information you will receive a you will receive an email, usually within 24 hours, with your user name and initial password.
- You may now login and start shopping!

MOHN Racks

From planning to implementation

Our experience is your advantage

At WINTERSTEIGER, we specialize in both rental and shop projects, so these can be connected right from the start. We can provide you with tailored solutions that seamlessly enhance efficiency, improve workflow, and ultimately enhance the customer experience across both areas of your business. Our commitment extends beyond the sale. We'll partner with you throughout your journey, from the initial planning stages to the moment the first ski or snowboard leaves your shop. We'll guide you in assessing your specific needs and determining the optimal storage and drying capacities. Our expertise will assist you in selecting the ideal systems, and we'll provide comprehensive support in planning, visualization, and presentation to ensure a smooth and successful implementation. After all, you don't build a rental shop every day: but fortunately the experts at WINTERSTEIGER do. Which is why we are the right partner to advise, plan, and implement your projects.

Implementation

Easystore storage systems

Ready, set, store!

Seasonal goods deliveries in the sports retail industry or equipment returns in the ski rental sector are classic scenarios that require sophisticated storage and drying systems. And that's quite a challenge when space is limited, so we know the value of every square foot. Easystore storage systems from WINTERSTEIGER offer great storage capacity on a minimal footprint – compact, flexible, and incredibly efficient.

- Working wonders with space: despite their compact dimensions, Easystore systems have an enormous amount of room for all equipment.
- With options such as wheels, feet, or a wall-mounted solution, Easystore storage systems can be installed where you want and moved as required.
- Whether upright, horizontal, suspended, or concealed in customized compartments – the wide range of options ensures that your equipment is always efficiently tucked away to save space.
- Configure your compartments and boxes for helmets, boots, bindings, or other accessories to make full use of every square foot!
- Our solutions are complemented by ingenious features for the ultimate functionality, such as a clever 3-point clamping system and a practical melt water runoff system.
- WINTERSTEIGER adheres to strict quality-oriented standards when choosing materials. Made from Sendzimir-galvanized sheet metal with an additional powder coating, our systems withstand even the harshest environments.

Standard

Wood decors

Printed

Easystore Flex

Designs and features

Easystore Flex storage systems are available with the following mounting options:

Rugged and smooth-running rail wheels

Standard rail system or rails with a trip guard for safe working.

Model with different castor wheels in a variety of sizes

Model with feet

Wall mounting

The modules can be mounted to the wall either directly or with the rack's vertical supports.

Easystore Depot

Tailor-made storage solutions – the right choice for everyone.

Easystore locker systems by WINTERSTEIGER make an impression with state-of-the-art design, maximum flexibility and stability, and maximum storage capacity on a minimal footprint. Customized features allow you to choose your own colors, logos, visuals and labeling to customize the locker design. Thanks to our partnership with Steurer Systems in the field of storage lockers, our range of rental, storage and drying systems has become even more versatile. We plan storage lockers individually based on your requirements, taking maximum space utilization, drying and disinfection into account and at the same time catering to your access system needs. Our Easyrent rental, storage and POS software makes storage management unbelievably fast and easy. It also features a simple module for managing and lock control for the Easystore locker systems.

Benefit from our experience.

WINTERSTEIGER supports you from the planning phase all the way to implementation of your perfect storage facility. Read the following pages to discover in detail what WINTERSTEIGER offers you.
