

Baseman

Base repair machine for skis and snowboards

The Baseman was developed with an ergonomic lightweight design for ease of work! It also brings many more benefits. The repair location is easier to see thanks to integrated LED lighting. The high-performance heating unit with electronic temperature control means that the machine is quickly ready for action. Improved melting technology guarantees a high-quality and wear-resistant bond between the base and the repair material. The optimized melting head and material feed ensure uniform and thin material application. Perfect distribution of material shortens the melting time and reduces the time spent for subsequent work steps such as base grinding.

Easier. Quicker.
Cleaner.

Benefits:

- High level of user convenience thanks to ergonomic lightweight design
- Efficient downstream processing thanks to optimum melting results
- Excellent cost-effectiveness thanks to frugal use of material and stand-by operation
- Rapid heat-up time thanks to powerful heating unit
- Best possible view of the repair location with integrated LED lighting
- Easy replacement of the base repair material roll
- Improved ambient air thanks to Smogjet exhaust air system (optional)

Baseman

Technical Data

Dimensions (W x H x D)	305 x 540 x 80 mm (12" x 21" x 3") (without docking station)
Weight	1,8 kg (4 lbs)
Nominal voltage	1AC 100 – 240 V, 50/60Hz
Nominal load	0,63 kW
Nominal current	5,8/2,8 A
Fuse protection min./max.	10/13 A
Polyethylene material	Ø 3 mm, 250 g
Connection for extraction unit	Ø 30 mm
Noise emission max.	< 52 dB (A)

We reserve the right to make technical alterations.
