

Safetronic

Ski binding adjustment and testing device

Faster adjustment speeds means shorter wait times – the Safetronic from WINTERSTEIGER simply makes you faster! The Safetronic impresses with its benefits: A tablet display with touch screen function ensures a great overview of the data, making input much easier and faster. The optional data interface to add the EasyRent software system additionally boosts your data management and overall efficiency. Digital documentation of the measurement data ensures legal compliance and provides paperless data storage for your rental business.

Binding adjustment is a value added service that increases revenue and brings customers back into the shop more often. Safety is key: Professional binding adjustment and testing helps build trust and greater customer loyalty.

Benefits:

- Fast adjustment speed allows more bindings to be serviced and makes waiting times shorter
- Tablet display with optimum data overview on a single page
- Practical clamping system makes it easier to secure the skis
- Data interface for efficient data management
- Digital documentation of measurement data for legal compliance and paperless data storage in your rental business

With the laser (option), the ski boot can be positioned quickly and precisely.

The QR/EAN code scanner lets you design your workflows efficiently and individually.
