

# PREVENTIVE MAINTENANCE PROGRAM 2026

# WINTERSTEIGER

Thinking about tomorrow.

Since 1953, WINTERSTEIGER has served as a trusted partner to our customers around the world. As the global leader in the field of Ski and Snowboard tuning machines, we provide an unmatched level of experience and support for your machinery and shop needs. When you sign up for our Preventative Maintenance Program (PMP), our technicians will service your machinery during a scheduled visit and explain the process so you know what to expect. A PMP on your machines can help to prevent costly in-season repairs and downtime during the season when you need your machines most. All machine PMP's at a single location are billed at a flat rate (see chart below). The age and condition of your machine may require more than the allotted hours, in which case additional labor will be billed per hour. Additional Travel Fees may apply if you require the PMP service to be performed outside of one of our scheduled service loops to your area.

Please email this completed form to [tech@wintersteiger.com](mailto:tech@wintersteiger.com), contact your local service technician, or navigate to [www.wintersteiger.com/msp](http://www.wintersteiger.com/msp) to sign up online. You can also find our address below, and mail this completed form to our office.

Sign up for your PMP before May 1<sup>st</sup>, 2026 and schedule the service with your technician during one of their planned service loops to receive the following benefits:

- 10% discount on parts and labor used during the PMP
- Extended payment terms until Oct. 15, 2026 – service can be scheduled anytime, the invoice isn't due until the Fall
- Waived Service Fee on in-season service calls after the PMP – Only pay the service fee once for the entire season
- 5% discount for parts used during in-season service calls

**Base Service fee: \$ 595.00 + each machine**
